FOREWORD

WHAT IS KIDS COUNT?

KIDS COUNT, a project of the Annie E. Casey Foundation, seeks to track the status of children across the United States and within individual states. The national KIDS COUNT program publishes an annual *KIDS COUNT Data Book* ranking state performance on 10 indicators reflecting the educational, social, economic, and physical well-being of children. The national program also produces related publications addressing concerns that affect child outcomes across states. State KIDS COUNT programs publish yearly reports detailing child well-being on a substate geography level (e.g., county or city). Both national and state KIDS COUNT programs strive to document conditions affecting children in the areas where they live so that national, state, and local decision-making can more effectively address children's needs through sound policy creation. For more information, visit the KIDS COUNT website at www.aecf.org/kidscount.

WHAT IS NORTH DAKOTA KIDS COUNT?

North Dakota KIDS COUNT, sponsored by the Annie E. Casey Foundation, has been examining critical issues for North Dakota children and families since 1994. North Dakota KIDS COUNT works with members of the educational community and others who advocate for children, and conducts research so that national, state, and local decision-makers can more effectively identify and address children's needs. North Dakota KIDS COUNT offers public presentations, networking, and a website, as well as several publication series. To view the various publications offered by the North Dakota KIDS COUNT program, visit our website at www.ndkidscount.org/publications.htm.

WHAT IS THE NORTH DAKOTA KIDS COUNT FACT BOOK?

The *North Dakota KIDS COUNT Fact Book*, now in its 12th year, is an annual publication that provides current state, regional, and county profiles based on seven categories of data representing multiple indicators of child health and well-being. Beginning in 2005, the *Fact Book* became an electronic publication only, thus bound versions of the publication are no longer produced. Please visit our website to view or print the *Fact Book* and other publications, research, and information regarding North Dakota children at www.ndkidscount.org.

In addition, *Fact Book* indicators are available on the Annie E. Casey Foundation's CLIKS (Community-Level Information on Kids) website at www.aecf.org/kidscount/cliks. CLIKS offers trends, graphs, maps, and rankings for North Dakota counties as well as for other participating states.

REPORT FORMAT

The 2006 *North Dakota KIDS COUNT Fact Book* is divided into three main sections:

1. Summary and Findings provide a summary of trend developments and an overview of findings for seven categories of indicators featured throughout the data profiles. These seven categories include:

- Population
- Family Composition
- Economic Condition
- Child Care
- Health
- Education
- Children At Risk

2. State, Regional, and County Profiles present the most recent available information (at the time of publication) for the seven categories of child well-being. Separate profiles are provided for the state, the eight state planning regions, and the 53 counties in North Dakota. Actual numbers of children or events are presented along with percentages that allow county-to-county and region-to-region comparisons. Data presented in the state profile are repeated in each county and regional profile for easy comparison.

3. Definitions and Data Sources supply explanations and indicator definitions along with information sources for respective data. Readers are strongly encouraged to use these definitions for clarification and reference for the data provided.

MODIFICATIONS

With this year's publication, the following modifications were made to the *Fact Book* report format and to data indicator definitions:

1. The format for the 2006 *Fact Book* was modified to include a Summary and Findings section beginning on page 9. This section presents an overview of findings and a summary of trend developments (when available) of the indicators for each of the seven categories of data. In some cases, Census 2000 data are the most current available, thus making trend analysis more difficult. In other cases, definitions of indicators have changed making comparisons over time inappropriate. In addition, in many cases, the number of events is too small to accurately indicate change over time or to provide comparisons with other geographies.
2. Data for Juvenile Offenses and Children Ages 10 to 17 Referred to Juvenile Court in the Children At Risk category were previously defined in the *Fact Book* as those cases that were "disposed of" in a particular year. Beginning with 2003 data (first presented in the 2005 *Fact Book*), the North Dakota Supreme Court began providing data representing cases that were "referred to court" in a particular year. Due to this new reporting procedure, comparisons to juvenile offense and court referral data presented in *Fact Books* prior to the 2005 publication should not be made. See pages 150-151 in the Definitions and Data Sources section for a detailed explanation.
3. Data for Juvenile Offenses in the Children At Risk category include all charges associated with juvenile court referrals; note that one referral may contain several charges for various offenses. To help clarify the difference between the number of offenses and the number of referrals, this year's *Fact Book* includes an additional indicator, Juvenile Court Referrals by Major Offense. Data provided by the North Dakota Supreme Court provide a description of the major offense associated with each referral. Thus, if a referral has multiple charges, only the major offense is described. The new indicator, Juvenile Court Referrals by Major Offense, will provide the total number of cases referred to juvenile court in a particular year as well as each referral's major offense by the following subcategories: alcohol, unruly behavior, offense against person, offense against property, and other. These subcategories replace those associated with the Juvenile Offenses indicator reported in *Fact Books* prior to this year's publication. Previously, for those referrals with multiple charges, each charge was incorrectly labeled with the major offense description, thus failing to represent the various types of offenses associated with each referral. Note that the total number of Juvenile Offenses in this year's *Fact Book* is comparable to the 2005 *Fact Book*. However, comparisons to offense subcategories presented in *Fact Books* prior to the 2006 publication should not be made. See pages 150-151 in the Definitions and Data Sources section for a detailed explanation.
4. Due to time limitations, the 2002 data for Children Impacted by Domestic Violence in the Children At Risk category have been reprinted in this year's *Fact Book*.

LIMITATIONS

Overall, indicators have been chosen on the basis of their availability by county, the validity of data sources, their ability to convey a broad array of child outcomes, the extent to which they provide for common interpretation, the possibility of their availability over time, and their usefulness as a tool to track long-term trends in child outcomes.

It must be noted that not all children affected by a particular condition are reported to or identified by the proper authorities, nor are they all enrolled in an appropriate service program. Therefore, caution must be exercised in assessing the actual number of children whose lives may be touched by a given situation.

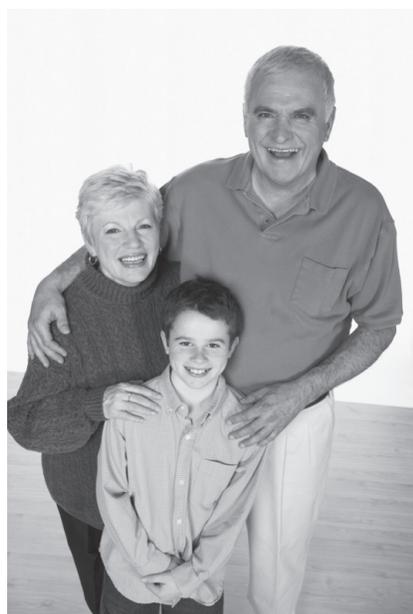

The 2006 *North Dakota KIDS COUNT Fact Book* data include American Indian children living outside American Indian tribal areas in all indicators. American Indian children living within American Indian tribal areas are included in all indicators with the exception of Child Abuse and Neglect Reports and Suspected Victims of Child Abuse and Neglect. In addition, data for Children Impacted by Domestic Violence exclude Standing Rock Reservation, Turtle Mountain Reservation, and the Trenton Indian Service Area. Also, WIC data exclude the Fort Berthold Reservation and the Standing Rock Reservation (see map on page 19 for American Indian tribal areas in North Dakota).

North Dakota KIDS COUNT gathers and organizes, but does not generate, the statistical information contained in the *Fact Book*. The data are supplied by government and not-for-profit agencies.

SUMMARY AND FINDINGS

*Examining
critical issues for
North Dakota
children and
families*

POPULATION

Due to fewer children and the aging of North Dakota's baby boomers, the state's median age rose from 32.4 in 1990 to 37.9 in 2004.

- U.S. Census Bureau

SUMMARY AND FINDINGS

- In 2004, children ages 0 to 17 comprised 22.2 percent of North Dakota's total population, compared to 25.0 percent in 2000 and 27.5 percent in 1990. Statewide, these children numbered 140,638 in 2004, a 12.6 percent decline from 160,849 in 2000 and a 19.8 percent decline from 175,385 in 1990.
- Within North Dakota, the proportion of all children ages 0 to 17 in 2004 ranged from a low of 16.3 percent in McIntosh County to a high of 35.4 percent in Sioux County. Between 1990 and 2000, five of North Dakota's 53 counties reported growth in the number of children (Cass, Burleigh, Rolette, Sioux, and Benson). However, current estimates indicate that the number of children declined in every county in the state between 2000 and 2004.
- Nationally, North Dakota had the 4th lowest percentage of children ages 0 to 17 in 2004 at 22.2 percent. Among states nationwide, the percentage of children ranged from a low of 21.2 percent in West Virginia to a high of 31.0 percent in Utah. Between 2000 and 2004, the number of children grew in 17 states, declined in 33, and grew 1.4 percent nationwide.
- Due to fewer children and the aging of North Dakota's baby boomers (i.e., those born between 1946 and 1964), the state's median age rose from 32.4 in 1990 to 37.9 in 2004 (5.5 years). In 39 of the 53 North Dakota counties, the median age increased by more than the statewide average, and five counties shifted by at least 10 years (Oliver, Billings, Mercer, McLean, and Slope). During the same time, the median age nationwide rose from 32.9 to 36.0.
- Though white children (of one race) comprised the vast majority of children ages 0 to 18 statewide in 2004 (87.6 percent of the total population), their numbers declined 12.8 percent between 2000 and 2004 (from 150,812 to 131,525). During the same time, the number of American Indian children (of one race), North Dakota's largest minority group, declined 3.9 percent (from 13,522 to 12,993). The state's smallest minority groups saw slight increases. Between 2000 and 2004, the number of Hispanic children (of any race) increased 2.1 percent (from 3,377 to 3,448), the number of African American children (of one race) increased 6.3 percent (from 1,407 to 1,496), and the number of Asian children (of one race) increased 1.2 percent (from 1,042 to 1,054).

FAMILY COMPOSITION

SUMMARY AND FINDINGS

- According to Census 2000, three-fourths of North Dakota children ages 0 to 17 lived with both parents (75.8 percent). Among states nationwide, only Utah had a larger proportion (78.7 percent). Nationally, nearly two-thirds of children lived with both parents (66.0 percent).
- Even with the large proportion of children living with both parents, data suggest that the composition of North Dakota families is changing. According to Census 2000, 30,695 children ages 0 to 17 (19.1 percent) lived with a single parent in North Dakota, a 23.3 percent increase from 24,886 in 1990. In addition, 3,901 North Dakota children (2.4 percent) lived with their grandparent(s) in 2000 compared to 2,628 in 1990, an increase of 48.4 percent. The number of North Dakota children living with a non-relative householder (i.e., a foster parent, a parent's unmarried partner or roommate, etc.) also increased during the past decade, from 1,837 in 1990 to 2,513 in 2000, an increase of 36.8 percent.
- The number of children served by the foster care system in North Dakota rose to 2,314 children in 2005, an increase of 17.0 percent (or 336 children) from 1,978 in 2000. According to the North Dakota Department of Human Services, parental involvement in methamphetamine-related issues is a major reason for this increase. The majority of children in foster care were placed in family home settings throughout the state in 2005 (60.6 percent). Nationally, the number of children served by the foster care system declined by approximately 1.4 percent between 2000 and 2004 (U.S. Department of Health and Human Services, Administration for Children and Families, AFCARS).
- Census data suggest that, along with changes in family composition, a growing proportion of mothers statewide are in the labor force. The percentage of North Dakota mothers with children ages 0 to 17 in the labor force grew from 74.4 percent in 1990 to 81.2 percent in 2000. In fact, with the exception of Eddy County, the proportion of working mothers grew in every North Dakota county between 1990 and 2000.
- Only one state, South Dakota, had a higher percentage of working mothers than North Dakota in 2000 (81.7 percent and 81.2 percent, respectively). Nationally, 69.1 percent of mothers with children ages 0 to 17 were in the labor force.

Single-parent families experience much higher rates of poverty than two-parent families. In 2000, the poverty rate for North Dakota children living with one parent (39.4 percent) was nearly six times the rate for children living with two parents (6.9 percent).

-U.S. Census Bureau, Census 2000

ECONOMIC CONDITION

SUMMARY AND FINDINGS

Certain segments of North Dakota's population are harder hit by poverty than others. According to Census 2000: 38.7 percent of non-white children lived in poverty; 44.2 percent of children living with single mothers lived in poverty; and 42.2 percent of children on American Indian reservations lived in poverty.

*-U.S. Census Bureau,
Census 2000*

- Overall, the economic condition of children in North Dakota is improving. According to Census 2000 data, 14.0 percent of North Dakota children ages 0 to 17 (who live in households and are related to the householder) lived in poverty (22,163 children) compared to 17.1 percent in 1990 (29,732 children). Those children living in households that were only a few paychecks away from poverty (with incomes between 100 and 149 percent of poverty, i.e., "near poor") decreased from 12.8 percent in 1990 (22,193 children) to 10.9 percent in 2000 (17,225 children). During the same time period, the median income for families with children ages 0 to 17 rose 10.7 percent to \$44,640 in 2000, up from \$40,333 in 1990 (after adjusting for inflation).
- Despite these gains during the 1990s, one in four children were still poor or near poor at the end of the decade in North Dakota. In addition, these positive statewide trends are not reflective of all populations within the state. Certain segments of North Dakota's population are harder hit by poverty than others. According to Census 2000: 38.7 percent of non-white children in North Dakota lived in poverty (7,345 children); 44.2 percent of children living with single mothers lived in poverty (10,737 children); and 42.2 percent of children living on American Indian reservations in North Dakota lived in poverty (3,749 children). In addition, five counties had at least one in four children living in poverty and another nine counties throughout the state had at least one in five children living in poverty in 2000. Nationally, 16.6 percent of children lived in poverty in 2000. Twenty-nine states had higher child poverty rates than North Dakota.
- North Dakota administers various federal and state benefit programs aimed at offering assistance to children and families in need. In 2005, 31,401 North Dakota children received free and reduced price lunches, 30.4 percent of total school enrollment statewide. This proportion has remained relatively unchanged over the past several years.
- Other programs offering economic assistance to North Dakota children include TANF, Medicaid and Food Stamps. In 2005, 10,424 children ages 0 to 19 in North Dakota received financial support through TANF, 6.5 percent of all children statewide. In addition, 41,794 children ages 0 to 20 received health care assistance through Medicaid (24.5 percent of all children statewide), and 32,464 children ages 0 to 18 received food stamps (21.6 percent of all children in statewide).

SUMMARY AND FINDINGS

- According to the Internal Revenue Service, 17,591 North Dakota families claimed the child-care tax credit in 2003. This is a conservative estimate of the number of families needing child care since additional families may be paying for child care but not applying for a tax credit while other families may be relying on family or friends for unpaid or informal child care.
- In addition to child-care tax credits, the potential need for child care can be estimated using data on children living with working parents. It is estimated that 72.6 percent of children ages 0 to 5 in North Dakota had working parents in 2000 (33,711 children). An additional 53,097 children ages 6 to 13 (73.5 percent of all children ages 6 to 13), who may need care before and after school, had working parents. Children with working parents include those children living with two working parents as well as those children living with a single parent who works.
- Legally recognized child-care providers (licensed and unlicensed) in North Dakota had the combined capacity to care for 39,268 children in February 2005. However, these numbers do not include informal networks of relatives, friends, or neighbors; Air Force base providers; or children in programs such as Head Start or Early Head Start.
- As of February 1, 2005, North Dakota reported 1,660 licensed child-care programs. Licensed child care in North Dakota is state-approved and reviewed yearly, with licenses being granted by county social services. The number of licensed providers throughout North Dakota has remained relatively constant during the past five years, averaging 1,667 per year between 2001 and 2005. The majority of licensed child-care providers consist of family or home-based situations. Family providers together with group child-care homes comprised 78.7 percent of all licensed providers in the state in February 2005. Large centers and group child-care facilities comprised 13.7 percent of all licensed providers. Other types of licensed providers consist of facilities holding multiple licenses, preschools, public approval programs, and school-age programs; together, they comprised 7.6 percent of all licensed providers in 2005.
- Legally recognized yet unlicensed child-care providers in the state included 964 self-certified providers (those completing an Affidavit of Standard Compliance) and registered providers, 254 tribal providers, and 831 approved relatives in February 2005.

The number of licensed child-care providers throughout North Dakota has remained relatively consistent during the past five years, averaging 1,667 per year between 2001 and 2005.

*- North Dakota
Department of Human
Services*

HEALTH

Prenatal care can improve birth outcomes and is more likely to be effective if begun early in pregnancy. Of the 8,179 births statewide in 2004, 476 (5.8 percent) were born to mothers receiving late or no prenatal care. This rate is up from 4.0 percent a decade ago.

*- North Dakota
Department of Health*

SUMMARY AND FINDINGS

- According to the North Dakota Department of Health, North Dakota reported 8,179 births in 2004, or 12.9 births per 1,000 persons. Births in North Dakota declined consistently throughout the 1980s and 1990s. However, between 2001 and 2004, the number of births in North Dakota increased, on average, 2.2 percent per year.
- Women receiving adequate prenatal care include women who began their prenatal care in the first four months of pregnancy and, given the age of gestation at birth, made at least 80 percent of the recommended physician or clinic visits prior to delivery. Of the 8,179 births statewide in 2004, 476 (5.8 percent) were born to mothers receiving late or no prenatal care. This rate is up from 4.0 percent a decade ago.
- Throughout North Dakota, 542 babies were born weighing less than 5.5 pounds (or 2,500 grams) in 2004. These low-birthweight babies comprised 6.6 percent of all births in 2004, compared to 5.4 percent in 1994. Nationally, North Dakota tied with Alaska for the 6th lowest percentage of low-birthweight births among all states in 2004 (National Center for Health Statistics).
- Of all North Dakota babies born in 2004, 45 died within a year (0.6 percent). Of these infant deaths, 31 (68.9 percent) were low-birthweight babies.
- Within North Dakota, 631 babies were born to teenage girls (ages 12 to 19) in 2004. Of these teenage births, 87.0 percent were born to unmarried teenagers (549 births). Out-of-wedlock teenage births in North Dakota comprised 6.7 percent of all births in 2004, a rate slightly down from 7.2 percent in 1994.
- Deaths of North Dakota children ages 1 to 19 totaled 56 in 2004, a 30.0 percent decline from 80 deaths in 1994. Accidents were the leading cause of death for North Dakota children ages 1 to 19 in 2004.
- The supplemental nutrition program for women, infants and children (WIC) provides nutritious foods as well as nutrition counseling and referrals to health and other social services to eligible participants at no charge. The number of North Dakota WIC program participants totaled 23,529 in 2005, up from 22,648 in 2004 and 21,936 in 2003. However, since 1995, the number of participants was highest in 1998 at 27,115.

SUMMARY AND FINDINGS

- North Dakota's public schools averaged 102,442 students daily during the 2004-05 academic year. Despite declining average daily memberships throughout North Dakota (2.0 percent declines per year, on average, since 1996-97), expenditures continue to rise. Since 1996-97, per student expenditures have increased, on average, 7.2 percent per year, totaling \$6,726 per student in 2004-05.
- North Dakota students continue to rank relatively well nationally in terms of academic achievement. Composite scores for 2005 North Dakota public high school graduates taking the ACT averaged 21.3 out of a possible 36, slightly higher than the national average of 20.9.
- During the past eight years, the number of North Dakota students enrolled in high school who then dropped out that year was nearly cut in half. The number of high school dropouts in North Dakota reached a high of 1,167 in 1998 (3.0 percent of total school enrollment). By 2005, the number of students who dropped out of high school declined to 647 statewide (1.8 percent). The national KIDS COUNT program publishes an alternative indicator to reflect high school dropouts. They report on the number of teenagers ages 16 to 19 who are not in school and not high school graduates. Using this measure, North Dakota and Iowa had the lowest high school dropout rates in the nation (3.0 percent each in 2004).
- In 2005, 13,886 North Dakota children ages 3 to 21 were enrolled in special education (14.1 percent of total public school enrollment). Statewide, 33.1 percent of students enrolled in special education had a specific learning disability, 31.0 percent had a speech impairment, 8.1 percent were emotionally disturbed, and 7.0 percent were mentally handicapped in 2005.
- Head Start is a federal program for preschool children in low-income families aimed at helping all children succeed. In January 2006, there were 2,806 North Dakota children ages 3 and 4 enrolled in Head Start programs. These children represented 68.7 percent of all children ages 3 and 4 who were eligible for the program. The vast majority of North Dakota children enrolled in Head Start were in center-based programs (84.8 percent). The rest (15.3 percent) were in home-based programs or in a combination of home- and center-based programs. These figures exclude participants in Early Head Start programs.

North Dakota students continue to rank relatively well nationally in terms of academic achievement. Composite scores for 2005 North Dakota public high school graduates taking the ACT averaged 21.3, slightly higher than the national average of 20.9.

-ACT, Department of Program Evaluation and Institutional Research Services

CHILDREN AT RISK

The number of North Dakota juveniles referred to court has steadily declined over the past three years.

- North Dakota Supreme Court

SUMMARY AND FINDINGS

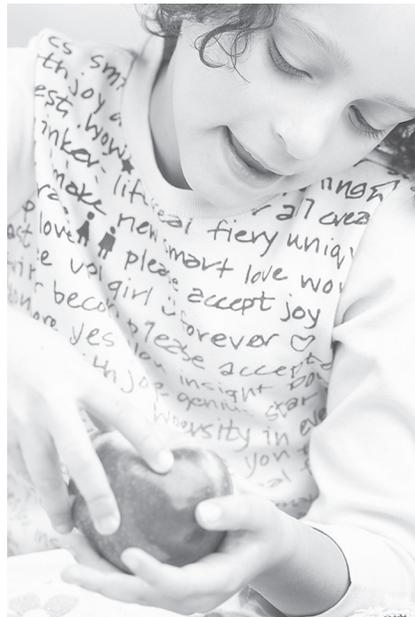

- A total of 5,934 North Dakota juveniles ages 10 to 17 were referred to court 11,223 times in 2005. Statewide, juvenile court referrals decreased by 11.1 percent between 2003 and 2005, from 12,629 to 11,223. National data, available through 2002, indicate that juvenile court referrals nationwide increased substantially between 1985 and 2002, though the recent trend (1997 to 2002) is one of decline (National Center for Juvenile Justice).
- While each juvenile court referral may have several charges for multiple offenses, an offense description is provided for the major offense only. The major offenses associated with the 11,223 North Dakota juvenile court referrals in 2005 were distributed into five categories: alcohol offenses (19.8 percent), unruly behavior (22.3 percent), offenses against person (7.6 percent), offenses against property (20.7 percent), and other offenses not included in the previously mentioned categories (29.7 percent).
- In addition to a decline in referrals, the number of North Dakota juveniles referred to court has declined as well over the past three years. In 2005, 5,934 juveniles ages 10 to 17 (8.6 percent of all children 10 to 17) were referred to court for various offenses. This number is down from 6,456 in 2004 (9.4 percent) and 6,683 in 2003 (9.3 percent). In addition, 32 of the 53 North Dakota counties experienced a decline in the proportion of children ages 10 to 17 referred to juvenile court between 2003 and 2005.
- Each time a juvenile is referred to court, he or she may be charged with multiple offenses. In 2005, North Dakota juveniles were charged with a total of 11,872 offenses, a decline from 13,386 offenses in 2003.
- In 2005, there were 6,876 children ages 0 to 17 suspected of being abused or neglected in North Dakota. Following assessments of these cases by Child Protection Service social workers, it was determined that 1,462 children (or 21.3 percent of all suspected victims) were in high-risk situations that required immediate services. The number of North Dakota children in these high-risk situations increased from 1,125 in 1998 to 1,462 in 2005, a 30.0 percent increase. However, the 2005 number marks an 11.5 percent decrease from 1,652 children in 2004.
- North Dakota children ages 16 to 19 who were not in school, not high school graduates, and not in the labor force (sometimes referred to as "idle teens" or "disconnected youth") comprised 1.7 percent of all children ages 16 to 19 in 2000. Only one state, Vermont, had a lower proportion (1.5 percent). Nationally, 3.9 percent of children ages 16 to 19 were not in school, not high school graduates, and not in the labor force.

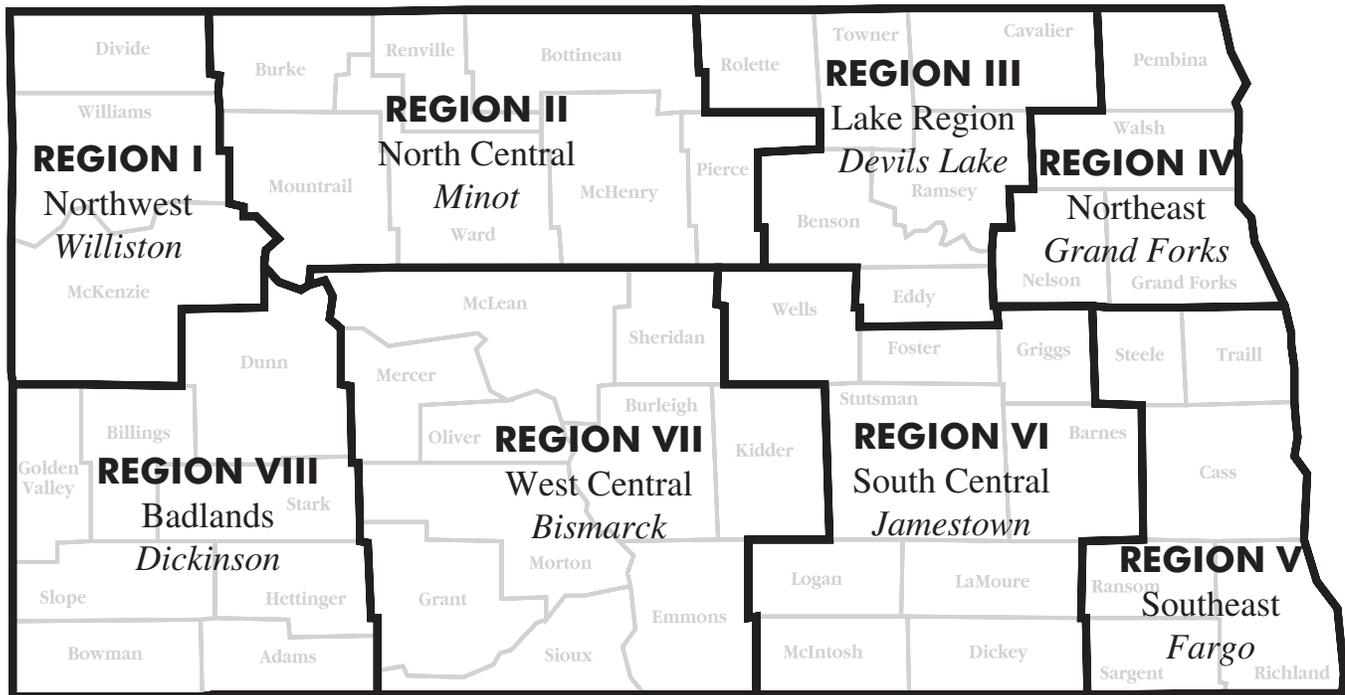

STATE, REGIONAL, AND COUNTY PROFILES

On-going evidence shows that challenges do not affect North Dakota children equally.

DEFINITIONS AND DATA SOURCES

PROFILE HEADERS

County Seat is the designated location for county government functions.

SOURCE: North Dakota Supreme Court. Available online at <http://www.ndcourts.com/court/counties/counties.htm>.

Population Rank, 2005 is based on the ordering of respective geographies by population; the largest population being ranked first (i.e., rank = 1). Counties are ranked in order from one to 53. Regions are ranked in order from one to eight. The state of North Dakota is ranked according to its position among all 50 states.

SOURCE: U.S. Census Bureau, Population Division.

Land Area, 2000 represents the size of respective North Dakota geographies in square miles.

SOURCE: U.S. Census Bureau, Census 2000.

Population Density, 2005 is the number of people residing in respective North Dakota geographies per square mile.

SOURCE: U.S. Census Bureau, Census 2000 and the Population Division.

Number of Households, 2005 represents an estimate of the number of housing units occupied by one person or a group of people. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room used as a separate living quarter.

SOURCE: North Dakota State Data Center, unpublished data.

Number of Families, 2005 represents an estimate of the number of families. Families consist of a householder and one or more other persons who are related to the householder by birth, marriage, or adoption. Not all households contain families since a household may comprise a group of unrelated persons or one person living alone.

SOURCE: North Dakota State Data Center, unpublished data.

Population Estimate, 2005 is the most current estimate of the number of people residing in respective geographic areas.

SOURCE: U.S. Census Bureau, Population Division.

POPULATION

Total Population, 2004 is the total number of people residing in respective North Dakota geographic areas. The percentage is the proportion these persons represent of the total population statewide.

SOURCE: U.S. Census Bureau, Population Division.

Median Age, 2004 divides the age distribution into two equal parts: one-half of the population is older than the median age and one-half is younger than the median age. There is no percentage calculated for this indicator.

SOURCE: U.S. Census Bureau, Population Division.

Population of Children Ages 0 to 17, 2004 represents the child population under the age of 18. Age categories 0 to 5 years, 6 to 12 years, and 13 to 17 years indicate the total number of children in these respective age groups. The percentages for the age categories are the proportion these children represent of the total population in respective geographic areas.

SOURCE: U.S. Census Bureau, Population Division.

Population of Children Ages 0 to 13, 2004 represents the child population under the age of 14. The percentage is the proportion these children represent of the total population in respective geographic areas.

SOURCE: U.S. Census Bureau, Population Division.

Population of Children Ages 0 to 18, 2004 reflects the child population under age 19 by racial composition. The racial indicators presented in this publication reflect those persons ages 0 to 18 reporting one race only. The percentage for the main indicator is the proportion children ages 0 to 18 represent of the total population in respective geographic areas. Percentages for racial categories represent the proportion of the total child population ages 0 to 18 in respective geographic areas. Racial categories include: White; Black or African-American; American Indian and Alaska Native; and Native Hawaiian, Asian and Other Pacific Islander. [Hispanic Origin of](#)

[Any Race](#) is reported as a discrete classification because it is considered a separate ethnic category and includes children of different racial backgrounds.

SOURCE: U.S. Census Bureau, Population Division.

FAMILY COMPOSITION

Children Ages 0 to 17 Living in Single-Parent Families, 2000 are the number of children ages 0 to 17 who live in families headed by one person - male or female - with no spouse present in the home. The percentage is the proportion these children represent of the total child population ages 0 to 17 in respective geographic areas. Children in this category include "own children" ages 0 to 17 who have never been married and are related to the family by birth, marriage, or adoption.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 1 (SF1), Table P28.

Females 16 Years and Older With Children Ages 0 to 17, 2000 are the total number of women ages 16 and older with children ages 0 to 17. The percentage represents the proportion of these women in the labor force in respective geographic areas.

[With Children Ages 0 to 5](#) includes women with children ages 0 to 5 only, and women with children ages 0 to 5 and one or more children ages 6 to 17 years. The percentage represents the proportion of these women in the labor force in respective geographic areas. [With Children Ages 6 to 17 Only](#) includes women who have children ages 6 to 17 only. The percentage represents the proportion of these women in the labor force in respective geographic areas.

The labor force is defined as persons ages 16 and older who are employed (part-time or full-time) or unemployed (have at some time been in the labor force and intend to be again). People not in the labor force include all persons 16 and older not classified as students, retirees, homemakers, and institutionalized persons.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3 (SF3), Table P45.

DEFINITIONS AND DATA SOURCES

Children Ages 0 to 18 in Foster Care, Fiscal Year 2005 are children placed in living situations outside their family homes as a result of Juvenile Court intervention. In most cases custody is given to either a County Social Service Board, a Tribal Social Service office, the Division of Juvenile Services, or the Executive Director of the North Dakota Department of Human Services (e.g., in cases where parental rights have been terminated). Beginning with the 2005 *Fact Book*, all children being served by the foster care program, regardless of their custodian, are reported for each county and region where they are being served. In editions prior to the 2005 *Fact Book*, county level data reflected only those children for whom the County Social Service Board in question was responsible. Thus, the county numbers did not include children in the custody of a division other than a County Social Service Board. Children in the custody of organizations other than County Social Service Boards were included in the statewide total.

The data are presented by type of placement: Family Home Placements, Residential Child Care Facility or Group Home Placements, and Other Placements. Numbers are unduplicated cases and exclude subsidized adoption. The percentage for the main indicator is the proportion these children represent of the total child population ages 0 to 18 in respective geographic areas. The percentages for the placement subcategories represent the proportion of children ages 0 to 18 in foster care in respective geographic areas. Family Home Placements - an occupied private residence in which foster care is regularly provided by the owner or lessee to no more than four children, unless all of the children in foster care are related to each other by blood or marriage, in which case such limitation does not apply. Residential Child Care Facility - a facility other than an occupied private residence providing foster care to more than eight unrelated children, except as may be otherwise provided by rule or regulation. Group Home Placements - an occupied private residence in which foster care is regularly provided for more than four but fewer than 10 unrelated children. Other Placements - include pre-adoptive homes, runaways, supervised independent living, trial home visits, and cases for which no specific placement was identified.

SOURCE: North Dakota Department of Human Services, Children and Family Services.

ECONOMIC CONDITION

Children Ages 0 to 17 Living in Poverty, 2000 are the number of children who are living in families with incomes below the federal poverty thresholds. The percentage is the proportion these children represent of the total child population ages 0 to 17 for whom poverty status is determined in respective geographic areas. The age categories 0 to 4 and 5 to 17 reflect the number of children living in poverty in both age categories. The percentages represent the proportion these children comprise of all children in each age category for whom poverty status is determined in respective geographic areas. The federal poverty thresholds are updated each year by the U.S. Census Bureau and were established in 1964 using guidelines set by the Social Security Administration. Income cutoffs are based on a formula utilizing family and individual income, family size, and age of family members. The formula is based on three times a family's food costs, according to the USDA's most economical food plans. The cost of this food plan is adjusted each year to reflect more current economic guidelines. The current 2005 poverty thresholds are included below. Children for whom poverty status is determined - include children who live in a household where they are related to the householder by birth, marriage, or adoption. Thus, children living in foster care or other institutional settings are excluded.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3 (SF3), Table P87.

The 2005 Federal Poverty Thresholds (Preliminary Weighted Averages):

Family Size	Annual Family Income
1	\$9,972
2	12,752
3	15,577
4	19,961
5	23,605
6	26,662

SOURCE: U.S. Census Bureau, <http://www.census.gov/hhes/www/poverty/threshld/05prelim.html>.

Children in Near-Poor Families, 2000 are the number of children ages 0 to 17 who live in families with incomes between 100% and 149% of the federal poverty threshold. The percentage is the proportion these children represent of the total child population ages 0 to 17 for whom poverty status is determined in respective geographic areas.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3 (SF3), Table PCT50.

Children Living in Extreme Poverty, 2000 are the number of children ages 0 to 17 who live in families with incomes below 50% of the federal poverty threshold. The percentage is the proportion these children represent of the total child population ages 0 to 17 for whom poverty status is determined in respective geographic areas.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3 (SF3), Table PCT50.

Median Income of Families With Children Ages 0 to 17, 2000 is the middle income point of the total number of families with children, including those with no income. Half of families with children fall above this point and half fall below. There is no percentage calculated for this indicator.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3 (SF3), Table PCT39.

TANF Recipients Ages 0 to 19, Fiscal Year 2005 are the number of children ages 0 to 19 who are eligible recipients of Temporary Assistance for Needy Families (TANF) and thus automatically eligible for Medicaid (see "Medicaid Recipients Ages 0 to 20" for a complete definition of the Medicaid program). The percentage is the proportion these children represent of the total child population ages 0 to 19 in respective geographic areas. TANF is a need-based income assistance program for families with children who need financial support because one parent is absent from the home, one parent is incapacitated, family income is within the program standards, or countable assets are within the program limits. TANF is not an entitlement program, and adult TANF recipients are limited to a lifetime total of benefits of no more than 60 months; however, the 60 months do not have

DEFINITIONS AND DATA SOURCES

to be consecutive months. Children who have received TANF benefits for 60 months may receive benefits when they are adults. Beginning July 1, 1997, TANF replaced Aid to Families with Dependent Children (AFDC). AFDC was an entitlement program that provided a monthly payment to parents or guardians on behalf of children who were defined as "dependent." AFDC was funded by both the federal and state governments and was administered by the state. Children must have been found eligible to receive such assistance by criteria laid down in federal and state law. Eligible children included needy children who had been deprived of support or care because of death to a caregiver, continued absence of a caregiver from the home, underemployment or unemployment of the principal wage earner, or physical or mental handicap of a caregiver.

Data on TANF reported in *North Dakota KIDS COUNT Fact Books* prior to the 2004 publication reflect children ages 0 to 20. Current reporting procedures by the North Dakota Department of Human Services required the definition change to reflect children ages 0 to 19.

SOURCE: North Dakota Department of Human Services.

Medicaid Recipients Ages 0 to 20, Fiscal Year 2005 are the number of children who are eligible recipients of Medicaid. The percentage is the proportion these children represent of the total child population ages 0 to 20 in respective geographic areas. Medicaid is a federally funded entitlement program available to eligible children based upon need. It is designed to assist individuals and families who do not have enough income to obtain health care. Medicaid is authorized by Title XIX, a 1965 amendment to the federal Social Security Act. Eligible persons include those receiving TANF or Social Security Income (SSI) payments; those terminated by TANF and in transition for four to 12 months; elderly, blind, or disabled people with low incomes; persons institutionalized, in foster homes, and certain adoptive children; pregnant women; and women with children ages 0 to 6. Medicaid differs from Medicare, which is a federally funded program for the elderly and disabled only. Data on Medicaid reported in *Fact Books* prior to the 2004 publication reflect children receiving Medicaid but not TANF.

Current reporting procedures by the North Dakota Department of Human Services required the definition change to reflect all children receiving Medicaid, regardless of whether or not they receive TANF.

SOURCE: North Dakota Department of Human Services.

Children Receiving Free or Reduced Price Lunch, October 2005 are the number of children receiving free or reduced price lunch at school. County numbers reflect the school location, not the residence of the child. The percentage is the proportion these children represent of total school enrollment in respective geographic areas. Children who participate in school-based nutrition programs receive free or reduced price lunch at school. They may also receive free or reduced price breakfast and/or milk. To receive a free meal, household income must be below 130% of the federal poverty threshold. Children in food stamp or TANF families are automatically eligible for free school meals. Families who receive commodity assistance through food distribution programs in American Indian tribal areas are also automatically eligible for free meals. To receive a reduced price meal, household income must be below 185% of the federal poverty threshold.

SOURCE: North Dakota Department of Public Instruction, Child Nutrition and Food Distribution.

Food Stamp Recipients Ages 0 to 18, Fiscal Year 2005 are the number of children ages 0 to 18 who are eligible recipients of food stamps, including migrant children. The percentage is the proportion these children represent of the total child population ages 0 to 18 in respective geographic areas. The Food Stamp Program is a uniform, nationwide entitlement program to supplement the nutritional needs of people whose income is at or below the poverty level. Households must meet eligibility requirements. An individual household's food stamp allotment is equal to the maximum allotment for that household's size, less 30% of the household's net income. Data on Food Stamps reported in *Fact Books* prior to the 2004 publication reflect children ages 0 to 17. Current reporting procedures by the North Dakota Department of Human Services required the definition change to

reflect children ages 0 to 18.

SOURCE: North Dakota Department of Human Services.

CHILD CARE

Licensed Child Care Providers, February 2005 are individuals or facilities to whom the right, authority, or permission has been granted by the North Dakota Department of Human Services to operate a family child care home, group child care home or facility, child care center, preschool educational facility, school-age program, public approval program, or multiple license facility. There is no percentage calculated for this indicator. A license is required if early childhood services are provided for four or more children ages 24 months and under, or six or more children at any one time. A *family child care home provider* refers to an occupied private residence in which early childhood services are provided for no more than seven children at any one time (or four infants). This type of home may also be allowed to care for up to two additional school-aged children during the two hours immediately before and after the school day or all day (except weekends or when school is not in session). A *group child care provider* refers to an occupied private residence or other facility where early childhood services are provided for eight to 18 children. A *child care center* refers to an early childhood facility where early childhood services are provided to 19 or more children based on available space. A *preschool educational facility* refers to a facility offering early childhood services and following a preschool curriculum designed primarily to enhance the educational development of the children enrolled in the facility. Children are served for no more than three hours per day. A *school-age program* offers early childhood services to children before and after school and during school holidays and summer vacations. A *public approval program* refers to state agencies that have child care facilities, such as North Dakota State University in Fargo, ND. A *multiple license facility* refers to a child care facility with more than one type of license.

SOURCE: North Dakota Department of Human Services.

DEFINITIONS AND DATA SOURCES

Licensed Child Care Capacity, February 2005 is the number of children that can be served by licensed child care providers. The percentage is the proportion these children represent of the total child population ages 0 to 13 in respective geographic areas.

SOURCE: North Dakota Department of Human Services.

Standard Compliance Certification and Registered Child Care Providers, February 2005 refer to two types of non-licensed child care providers. *Standard Compliance Certification*, also referred to as Self-Certified, are child care providers who have completed an Affidavit of Standard Compliance and Child Care Provider Contract. This is a voluntary self-certification process for child care providers who are not licensed and care for five or fewer children, with no more than three children younger than 24 months of age. *Registered* child care providers offer child care services in the child's home. This is a voluntary registration process for child care providers who are not licensed. There is no percentage calculated for this indicator.

SOURCE: North Dakota Department of Human Services.

Standard Compliance Certification and Registered Child Care Capacity, February 2005 is the number of children that can be served by standard compliance and registered child care providers. The percentage is the proportion these children represent of the total child population ages 0 to 13 in respective geographic areas.

SOURCE: North Dakota Department of Human Services.

Tribal Child Care Providers, February 2005 include tribally owned child care centers as well as relatives or non-relatives offering early childhood services in American Indian tribal areas within the state. Authority to provide child care is provided by the Tribal Council or designated Tribal Agency. There is no percentage calculated for this indicator.

SOURCE: North Dakota Department of Human Services.

Tribal Child Care Capacity, February 2005 is the number of children that can be served by tribal child care providers. The percentage is the proportion these children represent of the total child population ages 0

to 13 in respective geographic areas.

SOURCE: North Dakota Department of Human Services.

Approved Relative Child Care Providers, February 2005 are non-licensed child care providers. By federal law, the approved relatives must be related by marriage, blood relationship, or appointed by court order. Approved relative providers include grandparents, great-grandparents, aunts, and uncles. A sibling who is age 18 or older and who does not live in the same home as the child for whom care is being provided can also become an approved relative. There is no percentage calculated for this indicator.

SOURCE: North Dakota Department of Human Services.

Approved Relative Child Care Capacity, February 2005 is the number of children that can be served by approved relative child care providers. The percentage is the proportion these children represent of the total child population ages 0 to 13 in respective geographic areas.

SOURCE: North Dakota Department of Human Services.

HEALTH

Births to Mothers Receiving Inadequate Prenatal Care, 2004 refer to the number of births calculated by using both an infant's gestational age at birth and the number of prenatal visits completed by the mother at the time of birth: 1) gestational age 14-21 weeks with no prenatal visits; 2) gestational age 22-29 weeks with one or fewer visits; 3) gestational age 30-31 weeks with two or fewer prenatal visits; 4) gestational age 32-33 weeks with three or fewer prenatal visits; 5) gestational age 34+ weeks with four or fewer prenatal visits. The percentage is the proportion these infants represent of total live births in respective geographic areas. Women receiving adequate amounts of prenatal care include women who began their prenatal care in the first four months of pregnancy and, given the age of gestation at birth, made at least 80% of the recommended physician or clinic visits prior to delivery.

Data are not reported for geographies where

the number of events is five or less. In these cases, an 'NA' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Low-Weight Births, 2004 are the number of babies who weigh less than 2,500 grams (5 pounds, 8 ounces) at birth. The percentage is the proportion these babies represent of total live births in respective geographic areas. Data are obtained from birth certificates and are reported by mother's county of residence rather than the location of the hospital where the birth occurred.

Data are not reported for geographies where the number of events is five or less. In these cases, an 'NA' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Deaths of Infants Less Than 1 Year of Age, 2004 are the number of deaths occurring to infants less than 1 year of age, as recorded on death certificates. The percentage is the proportion these deaths represent of total live births in respective geographic areas. Data are reported by the infant's county of residence rather than the location of death.

Data are not reported for geographies where the number of events is five or less. In these cases, an 'NA' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Deaths of Children Ages 1 to 19, 2004 are the number of deaths for children ages 1 to 19, as recorded on death certificates. The percentage is the proportion these deaths represent of total deaths in respective geographic areas. Data are reported by the child's county of residence rather than the location of death.

Data are not reported for geographies where the number of events is five or less. In these cases, an 'NA' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Out-of-Wedlock Births to Teens Ages 12 to 19, 2004 are births occurring to a mother ages 12 to 19 who is not married at the time of conception, at the time of birth, or at any time between conception and birth.

DEFINITIONS AND DATA SOURCES

The percentage is the proportion these births represent of total live births in respective geographic areas.

Data are not reported for geographies where the number of events is five or less. In these cases, an 'NA' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Women, Infants, and Children (WIC) Program Participants, Fiscal Year 2005 are persons who are eligible for and receive a food voucher and nutrition education contract through the WIC Program. There is no percentage calculated for this indicator. The WIC Program provides coupons for specific foods to low-income pregnant and postpartum women, infants, and children younger than 5 years. To be eligible for WIC, low-income women, infants, and children must be found to be at nutritional risk for medical or dietary reasons. WIC is a prevention program targeted to provide nutrition education, nutritious food, and access to health care. This is not an entitlement program. The North Dakota WIC program covers the Spirit Lake and Turtle Mountain reservations as well as the Trenton Indian Service Area. Data for Fort Berthold and Standing Rock reservations are not included in WIC numbers.

SOURCE: North Dakota Department of Health, Division of Nutrition and Physical Activity, WIC Program.

EDUCATION

Average Expenditures Per Student in Public Schools, 2004-05 Academic Year includes average per student expenditures for instruction, administration, operation, and maintenance for public schools in respective geographic areas during a given school year. There is no percentage calculated for this indicator.

SOURCE: North Dakota Department of Public Instruction.

Average Daily Membership of Public Schools, 2004-05 Academic Year is the average number of students enrolled per day in public schools for respective geographic areas during a given school year. There is no percentage calculated for this indicator.

SOURCE: North Dakota Department of Public Instruction.

Children Ages 3 and 4 Enrolled in Head Start, January 2006 include children ages 3 and 4 enrolled in Head Start according to the following subcategories: home based, center based, and a combination of center and home based. County numbers reflect the location of the Head Start program, not the residence of the child. These figures exclude participants in Early Head Start programs. The percentage for the main indicator represents the number of children ages 3 and 4 enrolled in Head Start as a proportion of children ages 3 and 4 eligible for Head Start in respective geographic areas. The number of eligible children is calculated by adding the number of children enrolled in Head Start to the number of children not enrolled, but on a waiting list or the TANF list or otherwise deemed eligible by Head Start staff. The percentages for the subcategories represent the proportion of the child population ages 3 and 4 enrolled in Head Start in respective geographic areas. Authorized by the Economic Opportunity Act of 1964, Head Start is a federally funded, comprehensive early childhood education program created to help prepare economically disadvantaged children ages 3 and 4 to enter and succeed in elementary school. Ninety percent of children in the program must be from families with an income at or below the federal poverty level, while 10% can be from families that are not poor. At least 10% of Head Start slots in each state must be reserved for handicapped children. Services include cognitive and language development; medical, dental, and mental health services (including screening and immunizations); and nutritional and social services. Parental involvement is a strong component of the program. Not all eligible children ages 3 and 4 are enrolled. Participation rates are impacted by both availability of programs and parental choice in enrolling their children.

SOURCE: Program Directors with North Dakota Head Start Agencies.

Special Education Enrollment in Public Schools, December 2005 includes the number of children ages 3 to 21 enrolled in special education by age categories and in the following selected special education subcategories: emotionally disturbed, speech or language impaired, specific learning disability, and mentally handicapped. County

numbers reflect the school location, not the residence of the child. The percentage for the main indicator is the proportion special education children represent of total public school enrollment in respective geographic areas. The percentages for the age subcategories and the selected special education subcategories represent the proportion of the total child population enrolled in special education in respective geographic areas. Age categories include children ages 3 to 5, 6 to 11, 12 to 17, and 18 to 21. Emotionally Disturbed refers to a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree, that adversely affects a child's educational performance: 1) inability to learn what cannot be explained by intellectual, sensory, or health factors; 2) inability to build or maintain satisfactory interpersonal relationships with peers and teachers; 3) inappropriate types of behavior or feelings under normal circumstances; 4) a general pervasive mood of unhappiness or depression; 5) a tendency to develop physical symptoms or fears associated with personal or school problems. The term also includes schizophrenia. The term does not apply to children who are socially maladjusted unless it is determined they have a serious emotional disturbance. It should be noted that amendments to federal law removed the word "Seriously" from "Emotionally Disturbed." However, the definitions are the same, therefore, these data are comparable to data in previous editions of the *Fact Book*. Speech or Language Impaired refers to a communication disorder such as stuttering, impaired articulation, a language impairment, or a voice impairment that adversely affects a child's educational performance. Specific Learning Disability refers to a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not apply to children who have learning problems that are primarily the result of visual, hearing, or motor disabilities; mental handicap; emotional disturbance; or environmental,

DEFINITIONS AND DATA SOURCES

cultural, or economic disadvantage. Mentally Handicapped refers to significantly subaverage general intellectual functioning existing with additional deficits in motor, emotional, and social development. This category includes educable and trainable mentally handicapped individuals.

SOURCE: North Dakota Department of Public Instruction, Special Education.

Average ACT Composite Scores, 2004-05 Academic Year are average American College Testing Program scores in respective geographic areas. County numbers reflect the location of the high school, not the residence of the child. There is no percentage calculated for this indicator. ACT scores are designed to predict a student's potential for success in college. The highest possible score one can obtain is 36.

SOURCE: ACT, Department of Program Evaluation and Institutional Research Services, Research Division.

High School Dropouts, Grades 9-12, 2004-05 Academic Year are the number of children in grades 9-12 who have not completed high school and are not enrolled at a given point in time, regardless of when they dropped out. County numbers reflect the location of the high school, not the residence of the child. The percentage is the proportion these children represent of total school enrollment for grades 9-12 in respective geographic areas. This number reflects dropout events during a given school year; it does not reflect the success rate for high school students, or the proportion of students who actually graduate four years after they begin high school.

SOURCE: North Dakota Department of Public Instruction.

CHILDREN AT RISK

Child Abuse and Neglect Reports, Calendar Year 2005 are the total number of official assessments made to the North Dakota Department of Human Services (NDDHS) on behalf of a child where there was the suspicion of child abuse or neglect. There is no percentage calculated for this indicator.

Child abuse and neglect refers to any recent

act or failure to act on the part of a parent or caretaker, which results in the death, serious physical or emotional harm, sexual abuse, or exploitation, or an act or failure to act which presents an imminent risk of serious harm. *Physical harm* refers to any nonaccidental physical injury to the child, and can include striking, kicking, burning, or biting the child, or any action that results in a physical impairment of the child. *Emotional harm* refers to injury to the psychological capacity or emotional stability of the child as evidenced by an observable or substantial change in behavior, emotional response or cognition, or as evidenced by anxiety, depression, withdrawal, or aggressive behavior. A *neglected child*, also referred to as a *deprived child*, refers to a child who 1) is without proper parental care or control, subsistence, education, or other care or control necessary for the child's physical, mental, emotional health, or morals, and the deprivation is not due primarily to the lack of financial means of the child's parents, guardian, or other custodian; 2) has been placed for care or adoption in violation of law; 3) is without proper parental care, control, education, or other care and control necessary for the child's well-being because of the physical, mental, emotional, or other illness or disability of the child's parent or parents, and that such lack of care is not due to a willful act of commission or act of omission by the child's parents, and care is requested by a parent; 4) is in need of treatment and whose parents, guardian, or other custodian have refused to participate in treatment as ordered by the juvenile court; 5) was subject to prenatal exposure to chronic and severe use of alcohol or any controlled substance in a manner not lawfully prescribed by a practitioner; 6) is present in an environment subjecting the child to exposure to a controlled substance or drug paraphernalia. *Abandonment* of a child refers to a situation in which 1) the parent's identity or whereabouts are unknown, 2) the child has been left by the parent in circumstances where the child suffers serious harm, or 3) the parent has failed to maintain contact with the child or to provide reasonable support for a specified period of time. Definitions for *sexual abuse* are available in the North Dakota Century Code chapter 12.1-20 at <http://www.legis.nd.gov/cencode/t121.html>.

The North Dakota Century Code mandates

certain persons (those who have contact with children as a part of their professional duties) to report incidents of suspected child abuse or neglect. Any person may report an incident. The NDDHS or its designated agent, a regional or county Child Protective Services (CPS) social worker, will respond to the report by conducting an assessment of the family being reported. This process allows for the assessment of present safety to the child(ren) and the risk of future maltreatment, while simultaneously noting family strengths and needs. These strengths along with any necessary service interventions may lead to the amelioration of child maltreatment within a particular family. The CPS social workers use a risk assessment tool to help direct the intervention and assessment process. CPS teams determine if: 1) services are required; or 2) services are recommended; or 3) no services are required or recommended. If services are required, a high level of risk is determined to exist for the child(ren), and/or the family's needs are such that immediate service is required in order to lessen the safety risk. When it is determined that services are required, North Dakota Century Code requires a referral to Juvenile Court and a social worker (case manager) must be assigned to coordinate services. If services are recommended, but not required, a low to intermediate risk level is determined to exist for the child(ren) and/or the family has service needs, but court action will not be requested at the time of the decision. If no services are required or recommended, it has been determined that: 1) no to low risk for the child(ren) exists; and/or 2) the CPS team suggests a discussion with the family on the availability of services, which are unrelated to any specific risk factors; or 3) the family's service need is nonexistent.

SOURCE: North Dakota Department of Human Services, Children and Family Services.

Suspected Victims of Child Abuse and Neglect, Calendar Year 2004 are the number of children involved in assessments made to the North Dakota Department of Human Services (NDDHS) where there is the suspicion of child abuse or neglect (see "Child Abuse and Neglect Reports" for detailed definitions of abuse and neglect and a description of the assessment process). The percentage is the proportion these

DEFINITIONS AND DATA SOURCES

children represent of the total child population ages 0 to 17 in respective geographic areas. Child Protection Service (CPS) social workers determine if: 1) services are required; or 2) services are recommended; or 3) no services are required or recommended. In cases involving Victims in Cases Where Services Were Required, a high level of risk is determined to exist for the child(ren), and/or the family's needs are such that immediate service is required in order to lessen the safety risk. When it is determined that services are required, North Dakota Century Code requires a referral to Juvenile Court and a social worker (case manager) must be assigned to coordinate services. The percentage is the proportion these children represent of total suspected victims in respective geographic areas (see the definition of "Child Abuse and Neglect Reports" for other CPS determinations).

SOURCE: North Dakota Department of Human Services, Children and Family Services.

Children Impacted by Domestic Violence, Calendar Year 2002 are the number of children directly impacted by incidents of domestic violence reported to crisis intervention centers in North Dakota. The percentage is the proportion these children represent of the total child population ages 0 to 17 in respective geographic areas. Domestic violence typically refers to the use or threat of physical force against a current or former partner in an intimate relationship, resulting in fear and/or physical suffering on the part of the victim and witnessing household members. Data on Domestic Violence printed in the *North Dakota KIDS COUNT Fact Book* reflect county-specific numbers only, thus the state and regional totals are a sum of their counties. In addition, beginning with calendar year 2002 data, tribal numbers from Fort Berthold and Spirit Lake reservations have been included in domestic violence county-specific cases (data for Standing Rock Reservation, Turtle Mountain Reservation, and the Trenton Indian Service Area are not included). These new data were first reported by North Dakota KIDS COUNT in the 2003 *Fact Book*. Thus, comparisons to data prior to the 2003 publication should not be made. At the time of printing, updates to the data on domestic violence were not available. Thus, calendar

year 2002 data, reported in last year's *Fact Book*, were reprinted.

SOURCE: North Dakota Council on Abused Women's Services.

Juvenile Offenses, Calendar Year 2005 include all charges associated with juvenile court referrals. This indicator does not reflect the number of actual referrals, as one referral may have multiple charges. County numbers reflect the offense location, not the residence of the juvenile. There is no percentage calculated for this indicator. The various types of offenses, reported in *Fact Books* prior to the 2006 publication, are no longer presented as a subcategory of the Juvenile Offenses indicator. Rather, a description of the major offense for each referral is now reported along with the Juvenile Court Referrals indicator (a new indicator for the 2006 *Fact Book*). Juvenile offenses exclude referral cases involving abandonment, abuse/neglect, deprivation, file 960 (when no further action is recommended), educational neglect, other or no fault deprivations, termination of parental rights, or other special proceedings. A new reporting procedure for juvenile court referrals was implemented by the North Dakota Supreme Court beginning with 2003 data. In this new reporting procedure, the data reflect the year in which the case was referred to court, not the year when the case was settled (disposition date). This new reporting procedure affects data that were first reported by North Dakota KIDS COUNT in the 2005 *Fact Book*. Thus, comparisons to data presented in *Fact Books* prior to the 2005 publication should not be made.

SOURCE: North Dakota Supreme Court, State Court Administrator's Office.

Juvenile Court Referrals by Major Offense, Calendar Year 2005 include all cases referred to juvenile court along with the description of the major offense associated with each referral. One referral may have multiple charges, however, only a description of the major offense for each referral is provided. County numbers reflect the offense location, not the residence of the juvenile. There is no percentage calculated for the main indicator. The major offense subcategories represent one offense (the major offense) associated with each juvenile court referral by type of offense. In *Fact*

Books prior to the 2006 publication, these subcategories were incorrectly attributed to the Juvenile Offenses indicator. When a referral had multiple charges, the major offense description for the referral was inappropriately applied to each of the individual charges associated with that referral, which provided an inaccurate representation of the various offenses being committed. Thus, comparisons to offense subcategory data in *Fact Books* prior to the 2006 publication should not be made. The percentages for the major offense subcategories - Alcohol Offense, Unruly Behavior, Offense Against Person, Offense Against Property, and Other Offense - represent the proportion that each major offense category represents of total juvenile court referrals in respective geographic areas. Offenses are incidents that require referral to Juvenile Court, and can be made by police, parents, school teachers/officials, or other sources. These offenses exclude cases involving abandonment, abuse/neglect, deprivation, file 960 (when no further action is recommended), educational neglect, other or no fault deprivations, termination of parental rights, or other special proceedings. Alcohol Offense includes the purchase or possession of alcohol by a minor, delivery of alcohol to a minor, minor in a liquor establishment, and minor in possession/consumption. Unruly Behavior includes runaways in- and out-of-state, truancy, ungovernable behavior, violation of conditions for conduct and control, violation of curfew, and other unruly behavior. Offense Against Person includes assault, homicide, kidnaping or unlawful restraint, sex offenses, and other offenses against a person. Offense Against Property includes arson or endangering by fire, burglary, criminal mischief or damaging property, criminal trespass, forgery and counterfeiting, robbery, shoplifting, theft (other than shoplifting), unauthorized use of vehicle, and other offenses against property. Other Offense includes disorderly conduct, possession or purchase of controlled substances, cruelty to animals, tobacco purchase/smoking, resisting arrest, driving under the influence, driving without a license, open container, carrying a concealed weapon, illegal possession of a firearm, and all other offenses not contained in the above categories. A new reporting procedure for juvenile court referrals was implemented by the North Dakota Supreme Court beginning

DEFINITIONS AND DATA SOURCES

with 2003 data. In this new reporting procedure, the data reflect the year in which the case was referred to court, not the year when the case was settled (disposition date). This new reporting procedure affects data that were first reported by North Dakota KIDS COUNT in the 2005 *Fact Book*. Thus, comparisons to data presented in *Fact Books* prior to the 2005 publication should not be made.

SOURCE: North Dakota Supreme Court, State Court Administrator's Office.

Children Ages 10 to 17 Referred to Juvenile Court, Calendar Year 2005

reflect an unduplicated count of juveniles ages 10 to 17 referred to Juvenile Court in 2005. County numbers reflect the offense location, not the residence of the juvenile. In addition, the number of juveniles is unduplicated only at the county level of geography. Approximately 6 percent of juvenile offenders were referred to court in multiple counties in 2005. In these cases, each juvenile is counted once for each county in which they are referred. However, because the regional and state level data are a sum of the counties, these multi-county offenders are duplicated at the regional and state levels of geography. The percentage is the proportion these children represent of the total child population ages 10 to 17 in respective geographic areas. These referrals exclude cases involving abandonment, abuse/neglect, deprivation, file 960 (when no further action is recommended), educational neglect, other or no fault deprivation, termination of parental rights, or other special proceedings. A new reporting procedure for juvenile court referrals and offenses was implemented by the North Dakota Supreme Court beginning with 2003 data. In this new reporting procedure, the data reflect the year in which the case was referred to court, not the year when the case was settled (disposition date). This new reporting procedure affects data that were first reported by North Dakota KIDS COUNT in the 2005 *Fact Book*. Thus, comparisons to data presented in *Fact Books* prior to the 2005 publication should not be made.

SOURCE: North Dakota Supreme Court, State Court Administrator's Office.

Children Ages 16 to 19 Not Enrolled in High School, Not High School Graduates, and Not in the Labor Force, 2000

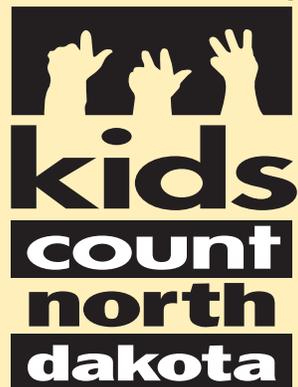

measures the number of children in this age category who have not completed high school and are not enrolled in school, nor are they in the labor force. The percentage is the proportion these children represent of the total child population ages 16 to 19 in respective geographic areas.
