

North Dakota KIDS COUNT 2016 Fact Book

State, Regional, and County
Profiles of Child Well-Being
in North Dakota

North Dakota
KIDS COUNT

Center for Social Research
North Dakota State University
ndkidscount.org

This book is dedicated to North Dakota's children, whose quality of life is intertwined with their communities' capacity to ensure that families can succeed.

NORTH DAKOTA KIDS COUNT

North Dakota KIDS COUNT is a state and county-by-county effort to track the status of children in North Dakota. It is sponsored by the Annie E. Casey Foundation and supported by the Center for Social Research at North Dakota State University. By providing policy makers and citizens with benchmarks of child well-being, North Dakota KIDS COUNT seeks to enrich local and state discussions concerning ways to secure a better future for all children.

The annual *North Dakota KIDS COUNT Fact Book* is designed to provide a detailed community-by-community picture of the condition of children. A national *Data Book* with state-level data is produced annually by the Annie E. Casey Foundation.

The findings presented in this report are those of the authors alone and do not necessarily reflect the opinions of our sponsors, contributors, or board members.

Permission to copy, disseminate or otherwise use information from this *Fact Book* is granted as long as appropriate acknowledgment is given.

PREFACE

WHAT IS KIDS COUNT?

KIDS COUNT, a project of the Annie E. Casey Foundation, is a national and state-by-state effort to track the well-being of children in the United States. At the national level, the project develops and distributes reports on key areas of well-being, including the annual *KIDS COUNT Data Book*, and explores the well-being of children using current data and policy analysis. The Foundation also maintains the KIDS COUNT Data Center, which uses the best available data to measure the educational, social, economic, and physical well-being of children. The Data Center features hundreds of indicators with more than four million data points. Users of the site are able to view national, congressional district, county, school district, and city data from across the country (<http://datacenter.kidscount.org>). In addition, the Annie E. Casey Foundation funds a network of state-level organizations in all 50 states, Puerto Rico, the U.S. Virgin Islands, and the District of Columbia that provides a community-by-community picture of the condition of children. Both national and state KIDS COUNT programs strive to document conditions affecting children in the areas where they live so that national, state, and local decision-making can more effectively address children's needs through appropriate policies and programs. More information is available at: <http://www.kidscount.org>.

WHAT IS NORTH DAKOTA KIDS COUNT?

As part of the network funded by the Annie E. Casey Foundation, the KIDS COUNT program in North Dakota is located within the Center for Social Research at North Dakota State University. The program has been examining critical issues for North Dakota children and families since 1994. The mission of North Dakota KIDS COUNT is to provide objective, reliable, and relevant information on child well-being in order to inform local and state discussions about how to secure a better future for all of North Dakota's children. North Dakota KIDS COUNT updates county-specific data on the KIDS COUNT Data Center and provides an annual compendium of child well-being indicators, a quarterly fact sheet, a newsletter, a website, and a Facebook page. More information is available at the North Dakota KIDS COUNT website at <http://www.ndkidscount.org>.

WHAT IS THE NORTH DAKOTA KIDS COUNT FACT BOOK?

The *North Dakota KIDS COUNT Fact Book*, now in its 22nd year, is an annual publication that provides state, regional, and county profiles consisting of multiple indicators nested within six components of child well-being (i.e., demographics, family and community, economic well-being, education and early care, health, and safety and risky behavior).

Access to the *Fact Book* and other publications regarding North Dakota children is available on our website at <http://www.ndkidscount.org/>. *Fact Book* indicators are also available on the Annie E. Casey Foundation's KIDS COUNT Data Center website at <http://datacenter.kidscount.org/>. The Data Center offers trends, graphs, maps, and rankings for North Dakota counties and for other participating states.

REPORT FORMAT

The 2016 *North Dakota KIDS COUNT Fact Book* is divided into three main sections:

Summary and Findings

This section provides a summary of trends and an overview of findings for multiple indicators nested within six components of child well-being. The six components include:

- Demographics
- Family and Community
- Economic Well-Being
- Education and Early Care
- Health
- Safety and Risky Behavior

State, Regional, and County Profiles

Separate three-page profiles containing indicators within the six components of child well-being are provided for the state, the state's eight planning regions, and the 53 counties in North Dakota. Actual numbers of children or events are presented along with percentages to allow county-to-county and region-to-region comparisons. Data presented in the state profile are repeated in each county and regional profile for easy comparison.

Definitions and Data Sources

This section supplies explanations and indicator definitions along with limitations and information sources for respective data. Readers are strongly encouraged to use these definitions for clarification and reference for the data provided.

MODIFICATIONS

The following modifications were made to the *Fact Book* in this year's release:

1. A new indicator has been added to the Education and Early Care component of the 2016 *Fact Book* that looks at the percentage of students in a cohort who graduate high school with a standard diploma in four years. A cohort includes the number of first-time 9th graders in the fall of a particular school year plus students who transfer in, minus students who transfer out, emigrate, or die during the next four school years. This indicator replaces the measure in previous years' *Fact Books* that focused on the number of high school dropouts. Given the increasing levels of migration in many school districts throughout the state, it was determined that a cohort measurement of youth graduating from high school is a more accurate representation of achievement since the new measure accounts for transfers in and out of a class during the school year.
2. Within the Education and Early Care component are a series of measures that represent the percentage of high school students who are ready for college English, math, reading and science. The data are provided by ACT, Inc. The ACT College Readiness Benchmarks are scores on the ACT subject area tests that represent the level of achievement required for students to have a 50% chance of obtaining a B or higher, or about a 75% chance of obtaining a C or higher in corresponding credit-bearing first-year college courses. Based on a nationally stratified sample, the Benchmarks are median course placement values for these institutions and represent a typical set of expectations. ACT College Readiness Benchmarks were revised for 2013 graduating class reporting. Out of a possible 36, the reading benchmark was adjusted from 21 to 22 and the science benchmark was revised from 24 to 23.
3. Within the Safety and Risky Behavior component, the measures focusing on the types of referrals to juvenile court and number of juvenile offenses have been removed. The *Fact Book* will continue to include a measure focusing on the unduplicated number of youth ages 10 through 17 who are referred to court for delinquent and unruly behavior at least one time during the calendar year. For additional information on juvenile court activity in North Dakota, the North Dakota court system issues an annual report available at <https://www.ndcourts.gov/court/juvenile.htm>.
4. Within the Health component, the measure focusing on the number of children enrolled in the Healthy Steps (i.e., the Children's Health Insurance Program, CHIP, for North Dakota) has been removed.

LIMITATIONS

General

Overall, indicators have been chosen on the basis of their availability by county, their ability to convey broad elements of child well-being, the extent to which they provide for common interpretation, their availability over time, their usefulness as a tool to track long-term trends in child well-being, and the validity of data sources.

In some cases, the data are likely conservative estimates as not all children affected by a particular condition are reported to or identified by the proper authorities, nor are they all enrolled in an appropriate service program. Therefore, caution must be exercised in concluding these data represent the actual number of children whose lives may be affected by a given situation.

North Dakota KIDS COUNT gathers and organizes, but does not generate, the statistical information contained in the *Fact Book*. Please refer to the Definitions and Data Sources section for limitations and notes specific to each indicator.

American Indian Children

The 2016 *North Dakota KIDS COUNT Fact Book* data include American Indian children living outside American Indian tribal areas in all indicators. American Indian children living within tribal areas are included in all indicators with the following exceptions: data for Child Abuse and Neglect Reports and Victims exclude tribal data; WIC data exclude the Fort Berthold Reservation and the Standing Rock Reservation; and Youth Referred to Juvenile Court exclude tribal court referrals (see map on page 19 for tribal areas in North Dakota).

SUMMARY AND FINDINGS

*North Dakota
KIDS COUNT
seeks to
examine critical
issues for
North Dakota
children and
families.*

DEMOGRAPHICS

For four years in a row, North Dakota has had the fastest growing population among states in the U.S., growing 2 percent in the past year – nearly three times the national average in 2015¹.

SUMMARY AND FINDINGS

Population

Energy development activity in western North Dakota continues to impact population trends in the state. Shifting migration patterns and an increase in total births have resulted in significant population growth for the state over the past decade. For four years in a row, North Dakota has led the nation with the fastest growing population among states. According to the 2015 population estimates from the U.S. Census Bureau, North Dakota has 756,927 residents, a record high¹. This also represents a 2 percent growth from 2014, a growth rate nearly three times the national average.

In 2014, children ages 0 through 17 comprised 23 percent of the total population in North Dakota (i.e., 168,527 children). After nearly two decades of continuous loss, the number of children has grown consistently since 2008, by approximately 3 percent annually through 2014.

The majority of North Dakota counties (33 of 53) had an increase in the number of children from 2013 to 2014, with the fastest growth located in western North Dakota (McKenzie 24%, Stark 13%, Williams 11%, and Divide 9%).

Total Births

The number of young children ages 0 through 5 began increasing in 2003, which parallels the upswing in total births. After decades of decline, total births began to increase in 2002 when there were 7,755 births. By 2014, there were 11,352 births recorded statewide by the North Dakota Department of Health.

Births to teenagers in North Dakota totaled 570 in 2014, which is 5 percent of all births statewide. The teen birth rate in North Dakota decreased 17 percent over the past few years, from 29 births per 1,000 female teens in 2010 to a rate of 24 in 2014. Nationally, the trend in teen births is similar, decreasing by 9 percent from 2013 to 2014, resulting in 24 births per 1,000 female teens in 2014².

Race and Ethnicity

Race and ethnicity have important implications for culture, identity, and overall well-being. Children of different races and ethnicities often show large variation in well-being including health, mortality, school performance and attainment, and access to family and community resources³.

While minority children continue to represent a relatively small percentage of North Dakota's youth overall, the state is becoming more racially diverse. Comprising 14 percent of North Dakota's children in 2014, the number of Black, Asian, and American Indian children combined grew twice as fast as White children from 2010 to 2014. The number of Hispanic youth (of any race) grew six times faster than the number of White children. Estimates suggest that at a national level, there will be no race-ethnic majority among children by 2018 (i.e., White, Non-Hispanic youth will comprise less than 50 percent of all youth nationwide)³.

FAMILY AND COMMUNITY

SUMMARY AND FINDINGS

Living Arrangements

While the majority of all North Dakota children ages 0 through 17 live with their parent/s, the composition of families continues to change. In 2014, 69 percent of North Dakota children lived with both parents. This percentage is down from 82 percent in 1990. During the same period of time, the percentage of children living with a single parent has increased. In 1990, 14 percent of children lived with a single parent. This percentage increased to 23 percent in 2014. Also on the rise is the number of children living with their grandparents. In 2014, 4 percent of North Dakota children lived with a grandparent (6,422 children), which is up from 2 percent in 1990 (2,628 children).

Approximately 1 percent of North Dakota children received foster care services in 2015 (2,344 children). The majority of children in foster care are in a family home (82%). Approximately one in six children in foster care are in a group home or institution (16%).

While most North Dakota babies are born to married mothers, one-third of births in 2014 were to unmarried women (32%). The percentage of births to unmarried women was 23 percent in 1994 and grew an average of 3 percent per year through 2005 where it has remained relatively unchanged through 2014. Approximately 14 percent of births to unmarried women in 2014 were to teenagers. Births to unmarried teens ages 12 through 19 totaled 511 in 2014, which is 5 percent of all births statewide.

Working Parents

Most North Dakota children live with their mothers (whether they are married or single) and most North Dakota mothers work. In 2014, 86 percent of all North Dakota children lived with their mother, which is the fifth largest percentage in the nation (behind Utah, Minnesota, Massachusetts, and Connecticut). In addition, 80 percent of North Dakota mothers were in the labor force in 2014, the seventh largest percentage nationwide. Nationally, 73 percent of mothers with children ages 0 through 17 were in the labor force in 2014.

A major contributor to financial stability and well-being of children is secure parental employment¹. In 2014, 76 percent of children ages 0 through 13 in North Dakota lived in situations where all parents were in the labor force, which is the fifth largest percentage among states (behind South Dakota, Iowa, Minnesota, and Nebraska). Nationally, 68 percent of children live with parents who are all in the labor force.

Employed Youth

Employment can provide valuable experience for youth. In moderation, work experience can help youth build skills and can open up valuable opportunities as youth prepare for work and a career². In North Dakota, nearly half of teens ages 16 through 19 were employed in 2014 (45%), which is the second largest percentage among states (behind South Dakota). Among young adults ages 20 through 24 in North Dakota, 75 percent were employed in 2014 - which was the largest percentage among states.

North Dakota leads the nation in the percentage of young adults ages 20 to 24 who were employed in 2014 (75%).

ECONOMIC WELL-BEING

SUMMARY AND FINDINGS

In 2015, 4,887 children and youth received TANF in North Dakota, which is down from 5,358 in 2014 (a decrease of 9% in one year).

Income and Poverty

Despite a recent reduction in oil and agricultural commodity prices, which has resulted in a decline in the gross state product for North Dakota¹, the state's overall economy remains quite strong. North Dakota continues to have the lowest unemployment rate among states² and per capita income has increased substantially since 2006¹. In addition, the median household income for families with children grew to \$71,072 in 2014. Despite this economic growth, child poverty has been unaffected by the state's prosperity. Slightly more than one out of every seven children living in North Dakota is considered impoverished (15% in 2014, or 22,498 children).

The poverty threshold for a family of four in 2014 was \$24,230³. Research shows that families need an income of approximately twice the official poverty threshold to cover the entire cost of basic expenses for housing, food, transportation, health care and child care⁴. In North Dakota, 33 percent of children live in families earning less than twice the poverty threshold (i.e., incomes less than 200% of poverty).

Younger children (i.e., ages 0 through 4) in the state had a higher poverty rate than older children (i.e., ages 5 through 17) in 2014 (17% compared to 14%, respectively); in eight North Dakota counties, at least one in five children was living in poverty. Children living on American Indian reservations tend to have the highest child poverty rates in North Dakota. Data from 2014 indicate that about half of all children in Benson, Rolette, and Sioux counties were impoverished (51%, 50%, and 46%, respectively).

Public Assistance

Public benefit programs are available to help low-income families and children in North Dakota. The federal Supplemental Nutrition Assistance Program (i.e., SNAP, formerly the Food Stamp Program) helped provide food to 36,954 North Dakota children ages 0 through 18 in 2015 (21% of children statewide). The free or reduced price lunch program served 35,976 North Dakota school children in 2015 (31% of total school enrollment). In four of North Dakota's 53 counties, at least half of students received free or reduced price lunches in 2015 (Sioux, Rolette, Benson, and Mountrail).

The Temporary Assistance to Needy Families Program (TANF), designed to help families in need achieve self-sufficiency, provided assistance to 4,887 North Dakota children ages 0 through 19 in 2015, which is down 9 percent from 5,358 in 2014.

In an effort to allow parents to work or attain the education necessary to become employed and self-sufficient, 6,639 children benefited from the North Dakota Child Care Assistance program in 2015 (5% of all children ages 0 through 13 statewide).

EDUCATION AND EARLY CARE

SUMMARY AND FINDINGS

Enrollment

North Dakota's public schools averaged 106,431 students daily during the 2014-15 academic year. After several years of continued decreases in enrollments, North Dakota's average daily enrollment in public schools increased an average of 2 percent per year since 2008-09. Four counties, three of which are located in western energy development areas, had the fastest growth in average daily enrollment in 2014-15, at least 10 percent each over the previous year (Burke, Sioux, McKenzie, and Mountrail). Nearly half of North Dakota's counties (23 of 53) reported a loss in average daily enrollment in 2014-15. Overall expenditures in North Dakota public schools averaged \$11,464 per student in 2014-15, which is a 5 percent increase from 2013-14.

Effective and appropriate education is an important resource for improving long-term outcomes for children and youth with special needs. In 2015, 13,987 North Dakota children were enrolled in special education (12% of public school enrollment). Of North Dakota children enrolled in special education, 30 percent had a specific learning disability, 21 percent had a speech impairment, 6 percent were emotionally disturbed, 5 percent had an intellectual disability, and 7 percent had autism.

According to decades of research, the best way to ensure successful students and productive adults in the future is to invest in early childhood development¹. In North Dakota, approximately one-third of children ages 3 and 4 were enrolled in early education programs in 2014 (36 percent) (i.e., programs offering educational experiences for children during the years preceding kindergarten - including Head Start).

Achievement

Most teenagers in North Dakota are engaged in school or work (98% in 2014) and most high school students graduate on time (86% in 2015). Of those students who graduate, many go on for higher levels of education. In Fall 2014, approximately two-thirds of recent North Dakota high school graduates were enrolled in degree-granting postsecondary institutions (67% or 4,825 students)². In preparation for college, most North Dakota students take the ACT which is a national college admissions examination.

ACT, Inc. has developed benchmarks in the areas of English, math, reading, and science to measure what it takes to be successful in standard first-year college courses. Based on these four benchmark areas, 62 percent of the 2015 ACT-tested North Dakota high school graduates were ready for college English, 42 percent were ready for college math, 41 percent were ready for college reading, and 38 percent were ready for college science. Approximately one in four graduates (24%) was ready for all four courses.

The vast majority of North Dakota high school students in the Class of 2015 graduated high school on-time in four years (86%).

EDUCATION AND EARLY CARE (CONT.)

SUMMARY AND FINDINGS

Licensed child care is currently meeting less than half (44%) of the potential need for care in North Dakota.

⁵Child Care Aware of North Dakota (2015). *Child Care Profile*. Retrieved from <http://www.ndchildcare.org/data-pub/>.

Child Care

As indicated in the Economic Well-Being section, North Dakota's economy is growing. With the lowest unemployment rate in the nation¹, almost all North Dakota parents are working. In 2014, 87 percent of North Dakota parents were in the labor force, which is the fifth largest percentage among states². This suggests that most children in the state are in need of quality early care and education opportunities. As noted in the Family and Community section, 76 percent of North Dakota children ages 0 through 13 live in families where all the parents are in the labor force (i.e., 91,681 children statewide) - which was the fifth largest percentage among states in 2014.

Reliable and affordable child care helps children, families, and communities prosper. With dependable child care, parents have greater opportunity to be productive at work and school. In addition, high-quality child care nurtures, stimulates, and supports children as they build the confidence and critical capacities they need to thrive in school and in life³.

As of February 2016, North Dakota reported 1,599 licensed child care programs with the capacity to care for 40,793 children. This means that licensed child care programs in the state have the ability to meet 44 percent of potential need. According to Child Care Aware of North Dakota, national child care standards recommend that licensed care should meet at least 50 percent of potential need⁴. Currently, four counties in North Dakota (i.e., Adams, Cass, Ward, and Ramsey) meet this recommended minimum.

Unlicensed Child Care

Legally recognized yet unlicensed child care providers in the state included 204 self-certified and in-home providers, 18 registered tribal child care providers, and 319 approved relatives in February 2016. Combined, these providers had the capacity to care for 1,856 children.

Informal networks of relatives, friends, and neighbors provide care for many North Dakota children. These situations are difficult to track and the number of providers and quality of care are not monitored. Yet these providers play an important role in helping North Dakota children begin school ready to learn and succeed.

Child Care Costs and Assistance

Child care has become part of the daily routine for thousands of North Dakota families, many of whom are struggling financially. According to 2015 data from Child Care Aware of North Dakota, care for one infant in a licensed center averages \$8,396 annually⁵.

As mentioned in the Economic Well-Being component of this report, the Child Care Assistance Program helped low-income families in North Dakota pay child care bills for 6,639 children in 2015, or 5 percent of all children ages 0 through 13 statewide.

SUMMARY AND FINDINGS

Vital Records

A healthy mother is important to the health of a child. Prenatal care can improve birth outcomes and is more likely to be effective if begun early in pregnancy¹. Of the 11,352 North Dakota births in 2014, 14 percent were to mothers receiving no prenatal care or care beginning after the first trimester. Mothers who do not receive prenatal care are much more likely to give birth to a low-weight baby¹. In 2014, 705 babies were born with a low birth weight (i.e., less than 5.8 pounds or 2,500 grams), which is 6 percent of all births. North Dakota had the second lowest percentage of low birth weight babies in the nation in 2014².

Problems relating to low birth weight can result in infant death. The death of a child is a tragedy for family and friends, and a loss to the community. In 2014, 49 North Dakota babies died within one year of life. Of all North Dakota deaths in 2014, 49 were children ages 1 through 19.

Hearing Impairment

Hearing loss can affect a child's ability to develop communication, language, and social skills. The earlier that children with a hearing impairment get services, the more likely they are to reach their full potential. In 2015, nearly all resident live births in North Dakota were screened for hearing loss (99%); of those screened, 10 percent did not pass the initial screening and were referred for further testing.

Assistance

The supplemental nutrition program for women, infants, and children (WIC) provides nutritious foods, nutrition counseling, and health and social service referrals to eligible participants at no charge. The number of North Dakota WIC participants totaled 21,690 in 2015. The number of WIC participants has decreased an average of 2 percent annually since 2008.

To assist North Dakota children needing health care, 57,157 youth (28% of youth ages 0 through 20 statewide) received health care assistance through Medicaid in 2015; which is up 6 percent from 53,814 in 2014. In eight North Dakota counties, at least one-third of young people received Medicaid in 2014.

Uninsured Children

Children without health insurance have limited access to health care, which can lead to a greater risk of illness and hospitalization. In addition, a lack of health insurance can have a negative influence on school attendance and participation in extracurricular activities, and increased financial and emotional stress among parents³. While most children in North Dakota are covered by some form of health insurance, 12,093 were uninsured in 2014, which is 7 percent of all children statewide. Nearly half of uninsured children live in families with low to moderate incomes and are potentially eligible for coverage programs such as Medicaid and Healthy Steps. In 2014, 5,533 uninsured North Dakota children were living at or below 200 percent of poverty, which is 46 percent of all uninsured children statewide.

Slightly more than 1 in 4 North Dakota young people received Medicaid in 2015, which is up 6 percent from the previous year.

SAFETY AND RISKY BEHAVIOR

SUMMARY AND FINDINGS

Following a national trend, the number of North Dakota juveniles referred to court has decreased an average of 5 percent annually since 2003.

Juvenile Court Referrals

Juvenile delinquency has potentially high stakes for both individuals and society as a whole. Delinquency is linked to higher crime rates in adulthood and other negative outcomes. One estimate suggests that between 50 and 75 percent of adolescents who have spent time in juvenile detention centers are incarcerated later in life¹. A total of 3,546 North Dakota juveniles ages 10 through 17 were referred to court (at least once) for delinquent or unruly behavior in 2015 (5% of all youth ages 10 through 17). Following a national downward trend, the number of North Dakota juveniles referred to court has decreased an average of 5 percent annually since 2003.

In 2015, the five most common delinquent referrals received by the Juvenile Courts were theft of property and shoplifting (16%), disorderly conduct (13%), possession of drug paraphernalia (9%), possession of a controlled substance (9%), and simple assault (7%)².

Of the unruly referrals received in 2015 (offenses which only a child can commit), 28 percent were for unlawful possession/consumption of alcohol, 26 percent were for ungovernable behavior, 24 percent for runaway, 12 percent for school truancy, and 10 percent for such things as tobacco and curfew violations².

Child Abuse and Neglect

Providing children with safe and secure environments free from abuse and neglect will improve the likelihood of positive educational, emotional, and social outcomes that extend into adulthood. In 2015, there were 6,437 children suspected of being abused or neglected in North Dakota. When a suspected case of abuse or neglect is investigated by the North Dakota Child Protection Services Program, a determination is made as to whether services are required to provide for the protection and treatment of a child. Following assessments of the 2015 cases by social workers, it was determined that 1,760 children were in high-risk situations requiring immediate services. The number of children requiring services for abuse and neglect has increased an average of 9 percent every year since 2010. Overall, for every 1,000 children in North Dakota, approximately 10 were maltreated in 2015; nationally, the rate was 9.4 per 1,000 in 2014³.

Idle Teens

The transition from youth into independent adulthood involves many challenges. While there are multiple pathways to success, the consequences of unemployment, under-employment, or not acquiring post-secondary education can be damaging and enduring. Males who are neither enrolled in school nor working are more likely to engage in delinquent behavior or illegal activities. Females in this group are more likely to become dependent on welfare⁴. Similar to the national average, North Dakota youth who were not in school, not high school graduates, and not in the labor force (referred to as idle teens) comprised 2 percent of all children ages 16 through 19 in 2014.

STATE, REGIONAL, AND COUNTY PROFILES

Research indicates that challenges do not affect all North Dakota children equally.

DEFINITIONS AND DATA SOURCES

PROFILE HEADERS

Location

DEFINITION: This indicator in the county profiles, refers to the North Dakota state planning region in which the county is located. In 1969, North Dakota established eight planning regions for the purposes of standardizing the regions being served by state agencies. Each planning region comprises of a group of counties and a regional council that provides a broad array of services and programs to communities in their service area including economic development planning, business lending, resource conservation, and community development. For more information, visit <http://www.business.nd.gov/data/regional/>.
SOURCE: North Dakota Department of Commerce.

State Capital and County Seat

DEFINITION: This indicator reflects the designated locations for state and county governmental functions.
SOURCE: North Dakota Supreme Court.

Total Population

DEFINITION: This indicator represents the most current number of people residing in respective geographic areas.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
LIMITATIONS: Age, race, and Hispanic origin characteristics for the current year's estimate were not available at the time of publishing. Thus, the characteristic data presented in the Demographics component reflect one year prior.
SOURCE: U.S. Census Bureau, Population Division.

Population Rank

DEFINITION: This indicator is based on the ordering of respective geographies by population; the geography with the largest population is ranked first (i.e., rank = 1). Counties are ranked from 1 through 53. Regions are ranked from 1 through 8. The state of North Dakota is ranked according to its position among all 50 states.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: U.S. Census Bureau, Population Division.

Land Area

DEFINITION: This indicator represents the size of respective North Dakota geographies in square miles.
GEOGRAPHY: Data reflect the respective geographic boundaries.
TIME FRAME: April 1 of referenced year.
SOURCE: U.S. Census Bureau, Census 2010, Redistricting Data SF (PL 94-171).

Population Per Square Mile

DEFINITION: This indicator, which represents population density, is the number of people residing in respective North Dakota geographies per square mile.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: U.S. Census Bureau, Population Division.

DEMOGRAPHICS

Total Population

DEFINITION: This indicator represents the total number of people residing in respective North Dakota geographic areas. It reflects the most current number available for substate characteristic data (i.e., age, race, and Hispanic origin).
PERCENTAGE: The denominator is the total resident population of North Dakota.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: U.S. Census Bureau, Population Division.

Median Age

DEFINITION: This indicator represents the central age point of the total population in respective North Dakota geographic areas. It is reflected in years and divides the population into two equal parts: half of the population is older than the median age and half is younger than the median age.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: U.S. Census Bureau, Population Division.

Population of Children Ages 0-17

DEFINITION: This indicator represents the child population under the age of 18. *Ages 0-2, Age 3, Ages 4-5, Ages 6-12, Age 13,*

and Ages 14-17 indicate the total number of children in these respective age groups.
PERCENTAGE: The denominator for each age group is the total population in respective geographic areas.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

Population of Children Ages 0-4

DEFINITION: This indicator represents the child population under the age of 5.
PERCENTAGE: The denominator is the total population in respective geographic areas.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

Population of Children Ages 0-5

DEFINITION: This indicator represents the child population under the age of 6.
PERCENTAGE: The denominator is the total population in respective geographic areas.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

Population of Children Ages 0-13

DEFINITION: This indicator represents the child population under the age of 14.
PERCENTAGE: The denominator is the total population in respective geographic areas.
GEOGRAPHY: Data reflect place of residence.
TIME FRAME: July 1 of referenced year.
SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

DEFINITIONS AND DATA SOURCES

Population of Children Ages 0-18

DEFINITION: This indicator reflects the child population under the age of 19 by racial composition. Racial categories include: *White; Black or African American; American Indian and Alaska Native; and Asian, Native Hawaiian, and Other Pacific Islander.*

PERCENTAGE: The denominator for the main indicator is the total population in respective geographic areas. For racial subcategories, the denominator is the total child population ages 0 through 18 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: July 1 of referenced year.

SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

Population of Children Ages 0-18 of Hispanic Origin

DEFINITION: This indicator reflects the child population under the age of 19 who are of Hispanic origin. Children of Hispanic origin may be of any race. Hispanic origin is considered a separate ethnic category that includes children of different racial backgrounds.

PERCENTAGE: The denominator is the total population ages 0 through 18 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: July 1 of referenced year.

SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, "U.S. Census Populations With Bridged Race Categories," http://www.cdc.gov/nchs/nvss/bridged_race.htm.

Total Births

DEFINITION: This indicator reflects the total number of resident live births in respective North Dakota geographic areas.

GEOGRAPHY: Data reflect mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of births is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Total Births to All Teens Ages 12-19

DEFINITION: This indicator represents resident live births occurring to mothers ages 12 through 19.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of teenage births is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

FAMILY AND COMMUNITY

Children Ages 0-17 Living in Single-Parent Families

DEFINITION: This indicator represents the number of children ages 0 through 17 who live in families headed by one person – male or female – with no spouse present at home. Children in this category include children ages 0 through 17 who have never been married and are related to the family by birth, marriage, or adoption.

PERCENTAGE: The denominator is the total number of children 0 through 17 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend

analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014).

SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Tables B09001 and B09002.

Children Ages 0-17 Living with Grandparents

DEFINITION: This indicator represents the number of children ages 0 through 17 who live in families headed by a grandparent (the parent may or may not live in the same household). Children in this category include children ages 0 through 17 who have never been married and are related to the householder by birth, marriage, or adoption.

PERCENTAGE: The denominator is the total number of children 0 through 17 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability.

Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014).

SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Tables B09001 and B09006.

Children in Foster Care

DEFINITION: This indicator represents the number of children under the age of 18 placed in living situations outside their family home as a result of Juvenile Court intervention. In most cases custody is given to either a County Social Service Board, a Tribal Social Service office, the Division of Juvenile Services, or the Executive Director of the North Dakota Department of Human Services (e.g., in cases where parental

DEFINITIONS AND DATA SOURCES

rights have been terminated). Numbers are unduplicated cases, exclude subsidized adoption, and reflect the number of children receiving foster care services during the reference year.

PERCENTAGE: The denominator is the total number of children 0 through 18 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Federal Fiscal Year (October 1 through September 30).

LIMITATIONS: Data are not reported for geographies where the number of foster care placements is one through five. In these cases '<6' is indicated.

NOTE: In editions prior to the 2005 *Fact Book*, county level data reflected only those children for whom the County Social Service Board in question was responsible. Thus, the county numbers did not include children in the custody of a division other than a County Social Service Board; children in the custody of organizations other than County Social Service Boards were included in the statewide total. Beginning with the 2005 *Fact Book*, all children being served by foster care, regardless of the custodian, are reported for each county and region where they are being served.

SOURCE: North Dakota Department of Human Services, Children and Family Services.

Total Births to All Unmarried Women

DEFINITION: This indicator represents resident live births occurring to a mother who is not married at the time of conception, at the time of birth, or at any time between conception and birth, as recorded by birth certificates.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of births to unmarried women is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Total Births to Unmarried Teens Ages 12-19

DEFINITION: This indicator represents resident live births occurring to a mother ages 12 through 19 who is not married at the time of conception, at the time of birth, or at any time between conception and birth, as recorded by birth certificates.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of births to unmarried teens is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Women in the Labor Force with Children Ages 0-17

DEFINITION: This indicator represents the total number of women ages 16 and older in the labor force who have children ages 0 through 17 (i.e., working moms). *With Children Ages 0-5* includes women in the labor force who have children ages 0 through 5 (they may also have older children). *With Children Ages 6-17 Only* includes women in the labor force who have children ages 6 through 17 only (i.e., no children less than age 6). The labor force is defined as persons ages 16 and older who are employed (part-time or full-time) or unemployed (not working, but actively looking and available to accept a job). People not in the labor force include persons 16 and older who are not employed and not actively seeking employment, such as students, retirees, homemakers, and institutionalized persons.

PERCENTAGE: The denominator is the total number of women ages 16 and older who have children in each age group in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability.

Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). **SOURCE:** U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B23003.

Children Ages 0-13 with All Parents in Labor Force

DEFINITION: This indicator represents the total number of children ages 0 through 13 with parents (all parents living in the household) who are in the labor force. Age categories provided for this indicator include *Ages 0-5* and *Ages 6-13*. The labor force is defined as persons ages 16 and older who are employed (part-time or full-time) or unemployed (not working, but actively looking and available to accept a job). People not in the labor force include persons 16 and older who are not employed and not actively seeking employment, such as students, retirees, homemakers, and institutionalized persons.

PERCENTAGE: The denominator is the total number of children in each age group in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend

DEFINITIONS AND DATA SOURCES

analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B23008, and calculations by North Dakota KIDS COUNT.

The data source identified for this indicator provides data for two age groups: 0 through 5 and 6 through 17; however, the typical age range for children needing child care is 0 through 13. The number of children ages 6 through 13 with parents in the labor force was derived by applying the proportion of children ages 6 through 17 with working parents to the number of children ages 6 through 13 (i.e., an age group more applicable to needing child care). The assumption in this estimation process is that children ages 6 through 13 have the same likelihood of having working parents as children in the larger age group (i.e., ages 6 through 17).

Employed Youth Ages 16-24

DEFINITION: This indicator represents the number of youth ages 16 through 24 who are employed in the labor force. Age categories provided for this indicator include *Ages 16-19* and *Ages 20-24*.

PERCENTAGE: The denominator is the total number of youth in each age group in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates,

Table B23001.

ECONOMIC WELL-BEING

Children Ages 0-17 Living in Low Income Families

DEFINITION: This indicator represents the number of children ages 0 through 17 living in families with incomes below 200% of the federal poverty threshold (i.e., with incomes up to twice the level of poverty). The federal poverty thresholds are updated each year by the U.S. Census Bureau and were established in 1964 using guidelines set by the Social Security Administration. Income cutoffs are based on a formula utilizing family and individual income, family size, and age of family members. The formula is based on three times a family's food costs, according to the USDA's most economical food plans. The cost of this food plan is adjusted each year to reflect current economic guidelines. The 2014 poverty thresholds are presented on the next page.

PERCENTAGE: The denominator is the total number of children ages 0 through 17 for whom poverty status is determined in respective geographic areas. Children for whom poverty status is determined include children living in households where they are related to the householder by birth, marriage, or adoption. Thus, children living in foster care or in a group/institutional setting are excluded from this indicator. **GEOGRAPHY:** Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014. **LIMITATIONS:** Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014).

SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B17024.

Children Ages 0-17 Living in Poverty

DEFINITION: This indicator represents the number of children ages 0 through 17 living in families with incomes below the federal poverty threshold. Age categories for this indicator include *Ages 0-4* and *Ages 5-17*.

The federal poverty thresholds are updated each year by the U.S. Census Bureau and were established in 1964 using guidelines set by the Social Security Administration.

Income cutoffs are based on a formula utilizing family and individual income, family size, and age of family members. The formula is based on three times a family's food costs, according to the USDA's most economical food plans. The cost of this food plan is adjusted each year to reflect current economic guidelines. The 2014 poverty thresholds are presented on the next page.

PERCENTAGE: The denominator is the total child population in each age group for whom poverty status is determined in respective geographic areas. Children for whom poverty status is determined include children living in households where they are related to the householder by birth, marriage, or adoption. Thus, children living in foster care or in a group/institutional setting are excluded from this indicator. **GEOGRAPHY:** Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014. **LIMITATIONS:** Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates,

DEFINITIONS AND DATA SOURCES

Table B17001.

*The 2014 Federal Poverty Thresholds
(Weighted Average Thresholds):*

Family Size	Annual Family Income
1	\$12,071
2	\$15,379
3	\$18,850
4	\$24,230
5	\$28,695
6	\$32,473

SOURCE: U.S. Census Bureau, <http://www.census.gov/data/tables/time-series/demo/income-poverty/historical-poverty-thresholds.html>.

Children Ages 0-17 Living in Extreme Poverty

DEFINITION: This indicator represents the number of children ages 0 through 17 who are living in families with incomes below 50% of the federal poverty threshold. The federal poverty thresholds are updated each year by the U.S. Census Bureau and were established in 1964 using guidelines set by the Social Security Administration. Income cutoffs are based on a formula utilizing family and individual income, family size, and age of family members. The formula is based on three times a family's food costs, according to the USDA's most economical food plans. The cost of this food plan is adjusted each year to reflect current economic guidelines. The 2014 poverty thresholds are included above.

PERCENTAGE: The denominator is the total number of children ages 0 through 17 for whom poverty status is determined in respective geographic areas. Children for whom poverty status is determined include children living in households where they are related to the householder by birth, marriage, or adoption. Thus, children living in foster care or in a group/institutional setting are excluded from this indicator. **GEOGRAPHY:** Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability.

Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). **SOURCE:** U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B17024.

Median Income of Families with Children Ages 0-17

DEFINITION: This indicator represents the central income point of the total number of families with children ages 0 through 17, including those with no income. The median is reflected in dollars and divides the number of families into two equal parts: half of families with children have incomes above the median and half have incomes below the median.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability.

Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014). **SOURCE:** U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B19125.

TANF Recipients Ages 0-19

DEFINITION: This indicator represents

the number of persons ages 0 through 19 who are recipients of Temporary Assistance for Needy Families (TANF) and thus automatically eligible for Medicaid (see the *Medicaid Recipients Ages 0-20* indicator in the Health component for a complete definition of the Medicaid program). TANF is a need-based income assistance program for families with children who need financial support (e.g., a parent is absent from the home, a parent is incapacitated, family income is within the program standards, or countable assets are within the program limits). TANF is not an entitlement program, and adult TANF recipients are limited to a lifetime total of benefits of no more than 60 months; however, the 60 months do not have to be consecutive months. Children who have received TANF benefits for 60 months may receive benefits when they are adults.

PERCENTAGE: The denominator is the total population ages 0 through 19 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Fiscal Year (July 1 through June 30).

NOTE: Beginning July 1, 1997, TANF replaced Aid to Families with Dependent Children (AFDC). AFDC was an entitlement program that provided a monthly payment to parents or guardians on behalf of children who were defined as "dependent." AFDC was funded by both the federal and state governments and was administered by the state. Children must have been found eligible to receive such assistance by criteria laid down in federal and state law. Eligible children included needy children who had been deprived of support or care because of death to a caregiver, continued absence of a caregiver from the home, underemployment or unemployment of the principal wage earner, or physical or mental handicap of a caregiver.

SOURCE: North Dakota Department of Human Services.

Eligible Recipients of Free or Reduced Price Lunch

DEFINITION: This indicator represents the number of children eligible to receive free or reduced price lunch at school. Children may also receive free or reduced price breakfast and/or milk. To receive a free or reduced price meal, household income must meet income eligibility requirements. Children in

DEFINITIONS AND DATA SOURCES

SNAP or TANF families are automatically eligible for free school meals. Families who receive commodity assistance through food distribution programs in American Indian tribal areas are also automatically eligible for free meals.

PERCENTAGE: The denominator is total school enrollment in respective geographic areas.

GEOGRAPHY: Data reflect the school location, not the student's place of residence.

TIME FRAME: October of referenced year.

SOURCE: North Dakota Department of Public Instruction, Child Nutrition and Food Distribution.

SNAP Recipients Ages 0-18

DEFINITION: This indicator represents the number of children ages 0 through 18 who are recipients of SNAP. The 2008 Farm Bill renamed the Food Stamp Program into the Supplemental Nutrition Assistance Program (SNAP). SNAP is a uniform, nationwide entitlement program to supplement the nutritional needs of people whose income is at or below the poverty level. Households must meet eligibility requirements.

PERCENTAGE: The denominator is the total population ages 0 through 18 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Fiscal Year (July 1 through June 30).

SOURCE: North Dakota Department of Human Services.

Child Care Assistance Recipients Ages 0-13

DEFINITION: This indicator represents the number of children ages 0 through 13 whose families receive North Dakota Child Care Assistance. The purpose of the Child Care Assistance Program is to help low-income families with child care costs while they are working or participating in allowable training or allowable education programs. For eligible families, the North Dakota Department of Human Services pays a percentage of their child care bill determined by using a sliding fee scale. Payment is made directly to the child care provider.

PERCENTAGE: The denominator is the total population ages 0 through 13 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Fiscal Year (July 1 through June 30).

SOURCE: North Dakota Department of Human Services.

EDUCATION AND EARLY CARE

Average Expenditures Per Student in Public Schools

DEFINITION: This indicator represents the average per student expenditures (in dollars) for instruction, administration, operation, and maintenance for public schools in respective geographic areas during a given school year.

GEOGRAPHY: Data reflect the location of the public school, not the student's place of residence.

TIME FRAME: Academic Year (Fall through Spring).

SOURCE: North Dakota Department of Public Instruction.

Average Daily Membership of Public Schools

DEFINITION: This indicator represents the average number of students enrolled per day in public schools for respective geographic areas during a given school year.

GEOGRAPHY: Data reflect the location of the public school, not the student's place of residence.

TIME FRAME: Academic Year (Fall through Spring).

SOURCE: North Dakota Department of Public Instruction.

Special Education Enrollment in Public Schools

DEFINITION: This indicator represents the number of public school children ages 3 through 21 enrolled in special education by age categories and in the following selected special education subcategories: *Emotionally Disturbed*, *Speech or Language Impaired*, *Specific Learning Disability*, *Intellectual Disability*, and *Autism*. Age categories provided for this indicator include *Ages 3-5*, *Ages 6-11*, *Ages 12-17*, and *Ages 18-21*.

Emotionally Disturbed refers to a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's educational performance:

1) inability to learn what cannot be

explained by intellectual, sensory, or health factors; 2) inability to build or maintain satisfactory interpersonal relationships with peers and teachers; 3) inappropriate types of behavior or feelings under normal circumstances; 4) a general pervasive mood of unhappiness or depression; 5) a tendency to develop physical symptoms or fears associated with personal or school problems. The term also includes schizophrenia. The term does not apply to children who are socially maladjusted unless it is determined they have a serious emotional disturbance.

Speech or Language Impaired refers to a communication disorder such as stuttering, impaired articulation, language impairment, or a voice impairment that adversely affects a child's educational performance.

Specific Learning Disability refers to a disorder in one or more of the basic psychological processes involved in understanding or using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not apply to children who have learning problems that are primarily the result of visual, hearing, or motor disabilities; intellectual disability; emotional disturbance; or environmental, cultural, or economic disadvantage.

Intellectual Disability refers to significantly sub-average general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period, that adversely affects a child's educational performance. *Autism* refers to a developmental disability significantly affecting verbal and nonverbal communication and social interaction, generally evident before age three, that adversely affects a child's educational performance. The term autism does not apply if the child's educational performance is adversely affected primarily because the child has an emotional disturbance, as defined by *Emotionally Disturbed* category.

PERCENTAGE: The denominator for the main indicator is total public school enrollment in respective geographic areas. The denominator for the subcategories (by each age group and type) is the total child population enrolled in special education in

DEFINITIONS AND DATA SOURCES

respective geographic areas.

GEOGRAPHY: Data reflect the school location, not the student's place of residence.

TIME FRAME: December of referenced year.

NOTE: Amendments to federal law removed the word "Seriously" from the subcategory *Emotionally Disturbed*. This name change was first reflected in the 2001 *Fact Book*.

The definition of this special education subcategory was not affected. Beginning with the 2012 *Fact Book*, the subcategory *Mentally Handicapped* was changed, based on 2011 state legislation, to *Intellectual Disability*. The definition of this special education subcategory was not affected.

SOURCE: North Dakota Department of Public Instruction, Special Education.

Children Ages 3 and 4 Enrolled in Preschool

DEFINITION: This indicator represents the number of children ages 3 and 4 enrolled in preschool. Preschool includes any group providing educational experiences for children during the years preceding kindergarten. Places where instruction is an integral part of the program are included, but private homes that primarily provide custodial care are not included. Children enrolled in programs sponsored by federal, state or local agencies to provide preschool education to young children, including Head Start programs, are considered as enrolled in preschool. Children enrolled in kindergarten are excluded from this analysis.

PERCENTAGE: The denominator is the total number of children ages 3 and 4 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap

with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014).

SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B14003.

Four-Year High School Cohort Graduation Rate

DEFINITION: This indicator represents the number of students in a cohort who graduate high school with a standard diploma within four years. Adjustments are made for transfers into and out of the school, district, or state.

PERCENTAGE: The denominator for the percentage is the cohort for that graduating class in respective geographic areas. A cohort includes the number of first-time 9th graders in the fall of a particular school year plus students who transfer in, minus students who transfer out, emigrate, or die during the next four school years. The percentage is referred to as the cohort graduation rate.

GEOGRAPHY: Data reflect the school location, not the student's place of residence.

TIME FRAME: Academic Year (Fall through Spring).

SOURCE: North Dakota Department of Public Instruction.

Average ACT Composite Scores

DEFINITION: This indicator represents average American College Testing (ACT) Program scores of graduating public high school seniors in respective geographic areas. ACT scores are designed to predict a student's potential for success in college. The highest possible score one can obtain on the ACT exam is 36.

GEOGRAPHY: Data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Percent of Public High School Graduates Ready for College English

DEFINITION: This indicator represents the proportion of all ACT-tested public high school graduates who scored 18 or better on the English portion of the ACT exam. The highest possible score one can obtain is 36. The ACT program has developed benchmarks to measure what it takes to be successful in standard first-year college courses in the areas of English, math, reading, and science. A score of 18 or better is the minimum score needed on the English portion of the ACT to indicate a 50 percent chance of obtaining a B or higher, or about a 75 percent chance of obtaining a C or higher in the corresponding credit-bearing college course of English composition.

GEOGRAPHY: Data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Percent of Public High School Graduates Ready for College Math

DEFINITION: This indicator represents the proportion of all ACT-tested public high school graduates who scored 22 or better on the math portion of the ACT exam. The highest possible score one can obtain is 36. The ACT program has developed benchmarks to measure what it takes to be successful in standard first-year college courses in the areas of English, math, reading, and science. A score of 22 or better is the minimum score needed on the math portion of the ACT to indicate a 50 percent chance of obtaining a B or higher, or about a

DEFINITIONS AND DATA SOURCES

75 percent chance of obtaining a C or higher in the corresponding credit-bearing college course of algebra.

GEOGRAPHY: Data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Percent of Public High School Graduates Ready for College Reading

DEFINITION: This indicator represents the proportion of all ACT-tested public high school graduates who scored 22 or better on the reading portion of the ACT exam. The highest possible score one can obtain is 36. The ACT program has developed benchmarks to measure what it takes to be successful in standard first-year college courses in the areas of English, math, reading, and science. A score of 22 or better is the minimum score needed on the reading portion of the ACT to indicate a 50 percent chance of obtaining a B or higher, or about a 75 percent chance of obtaining a C or higher in the corresponding credit-bearing college course of social science.

GEOGRAPHY: County and regional data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Percent of Public High School Graduates Ready for College Science

DEFINITION: This indicator represents the proportion of all ACT-tested public high school graduates who scored 23 or better on the science portion of the ACT exam. The highest possible score one can obtain is 36. The ACT program has developed benchmarks to measure what it takes to be successful in standard first-year college courses in the areas of English, math, reading, and science. A score of 23 or better is the minimum score needed on the science portion of the ACT to indicate a 50 percent chance of obtaining a B or higher, or about a 75 percent chance of obtaining a C or higher in the corresponding credit-bearing college course of biology.

GEOGRAPHY: Data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Percent of Public High School Graduates Ready for College in All Four Subject Areas

DEFINITION: This indicator represents the proportion of all ACT-tested public high school graduates who scored all of the following: 18 or better on the English portion, 22 or better on the math portion, 22 or better on the reading portion, and 23 or better on the science portion of the ACT exam. The highest possible score one can obtain is 36. The ACT program has developed benchmarks to measure what it takes to be successful in standard first-year college courses in the areas of English,

math, reading, and science. A benchmark score is the minimum score needed on an ACT subject-area test to indicate a 50 percent chance of obtaining a B or higher, or about a 75 percent chance of obtaining a C or higher in the corresponding credit-bearing college courses, which include English composition, algebra, social science, and biology.

GEOGRAPHY: Data reflect the location of the high school, not the student's place of residence.

TIME FRAME: Reference year of high school graduating class.

NOTE: A law passed by the 2009 North Dakota Legislative Assembly requires high school students to take the ACT or the WorkKeys assessment (i.e., a job skills assessment system measuring "real-world" skills that employers believe are critical to job success). The first test under the mandate was in April 2010.

LIMITATIONS: Data are suppressed in planning regions and counties where there are fewer than two public high schools.

SOURCE: ACT, Inc., Department of Program Evaluation and Institutional Research Services, Research Division.

Licensed Child Care Providers

DEFINITION: This indicator represents individuals or facilities to whom the right, authority, or permission has been granted by the North Dakota Department of Human Services to operate a family child care home, group child care home or facility, child care center, preschool educational facility, school-age program, or multiple license facility. Child care providers who are licensed by the state and located on tribal lands are included in this category.

Licensed Child Care Capacity is the number of children who can be served by licensed child care providers (i.e., child care supply).

PERCENTAGE: There is no percentage calculated for the number of providers. The denominator for capacity is the total child population ages 0 through 13 where all parents in the household are in the labor force (i.e., potential child care demand) in respective geographic areas.

GEOGRAPHY: Data reflect the location of the child care program. A total of 47 licensed, out-of-state providers cared for North Dakota children in February 2016 and are included in the state total. These out-of-state licensed providers had the capacity to

DEFINITIONS AND DATA SOURCES

care for 1,104 children.

TIME FRAME: February of referenced year.

SOURCE: Child care numbers are obtained from the North Dakota Department of Human Services. The proportions are calculated based on an estimation of the number of children with working parents, derived from data obtained from the U.S. Census Bureau's American Community Survey 5-Year Estimates.

Standard Compliance Certification (SCC) and In-Home Child Care Providers

DEFINITION: This indicator represents two types of non-licensed child care providers. Standard Compliance Certification, also referred to as 'Self-Certified', refers to child care providers who have completed an Affidavit of Standard Compliance and Child Care Provider Contract. This is a voluntary self-certification process for child care providers who are not licensed. Registered In-Home child care providers offer child care services in the child's home. This title reflects a voluntary registration process for child care providers who are not licensed. Child care providers meeting these criteria and located on tribal lands are included in this category. *Standard Compliance Certification (SCC) and In-Home Child Care Capacity* is the number of children who can be served by standard compliance and registered in-home child care providers (i.e., child care supply).

PERCENTAGE: There is no percentage calculated for the number of providers. The denominator for capacity is the total child population ages 0 through 13 where all parents in the household are in the labor force (i.e., potential child care demand) in respective geographic areas.

GEOGRAPHY: Data reflect the location of the child care program. A total of four out-of-state, standard compliance and registered in-home providers cared for North Dakota children in February 2016 and are included in the state total. These out-of-state providers had the capacity to care for 16 children.

TIME FRAME: February of referenced year. SOURCE: Child care numbers are obtained from the North Dakota Department of Human Services. The proportions are calculated based on an estimation of the number of children with working parents, derived from data obtained from the U.S. Census Bureau's American Community

Survey 5-Year Estimates.

Registered Tribal Child Care Providers

DEFINITION: This indicator represents tribal child care providers who are registered with the state of North Dakota, but are not licensed, self-certified, or approved relatives. Authority to provide child care is provided by the Tribal Council or designated Tribal Agency. *Registered Tribal Child Care Capacity* is the number of children who can be served by tribal child care providers who are registered with the state (i.e., child care supply).

PERCENTAGE: There is no percentage calculated for the number of providers. The denominator for capacity is the total child population ages 0 through 13 where all parents in the household are in the labor force (i.e., potential child care demand) in respective geographic areas.

GEOGRAPHY: Data reflect the location of the child care program.

TIME FRAME: February of referenced year. SOURCE: Child care numbers are obtained from the North Dakota Department of Human Services. The proportions are calculated based on an estimation of the number of children with working parents, derived from data obtained from the U.S. Census Bureau's American Community Survey 5-Year Estimates.

Approved Relative Child Care Providers

DEFINITION: This indicator represents a type of non-licensed child care provider. By federal law, the approved relatives must be related by marriage, blood relationship, or appointed by court order. Approved relative providers include grandparents, aunts, and uncles. A sibling who is age 18 or older and who does not live in the same home as the child for whom care is being provided can also become an approved relative. Approved relative child care providers located on tribal lands are included in this category. *Approved Relative Child Care Capacity* is the number of children who can be served by approved relative child care providers (i.e., child care supply).

PERCENTAGE: There is no percentage calculated for the number of providers. The denominator for capacity is the total child population ages 0 through 13 where all parents in the household are in the labor force (i.e., potential child care demand) in respective geographic areas.

GEOGRAPHY: Data reflect the location of the child care program. A total of four out-of-state, approved relative providers cared for North Dakota children in February 2016 and are included in the state total. These out-of-state providers had the capacity to care for 12 children.

TIME FRAME: February of referenced year. SOURCE: Child care numbers are obtained from the North Dakota Department of Human Services. The proportions are calculated based on an estimation of the number of children with working parents, derived from data obtained from the U.S. Census Bureau's American Community Survey 5-Year Estimates.

HEALTH

Births with Prenatal Care Beginning After the First Trimester or Not at All

DEFINITION: This indicator represents births to mothers who receive no prenatal care at all, or receive prenatal care beginning after the first trimester. The first trimester is calculated, based on elements obtained from the birth certificate, as the date of LMP (last menstrual period) through day 88 of the pregnancy.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of births to mothers receiving late or no prenatal care is one through five. In these cases '<6' is indicated.

NOTE: The Centers for Disease Control and Prevention uses a different method than the North Dakota Department of Health to calculate days in a trimester. Thus, numbers released by the CDC will differ from those published here.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Low Birth Weight Births

DEFINITION: This indicator represents the number of babies who weigh less than 2,500 grams (5 pounds, 8 ounces) at birth, as

DEFINITIONS AND DATA SOURCES

recorded by birth certificates.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the mother's place of residence rather than the location of the hospital where the birth occurred.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of low weight births is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Deaths of Infants Less Than 1 Year of Age

DEFINITION: This indicator represents the number of deaths occurring to infants less than 1 year of age, as recorded on death certificates.

PERCENTAGE: The denominator is total resident live births in respective geographic areas.

GEOGRAPHY: Data reflect the infant's place of residence rather than the location of death.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of infant deaths is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Deaths of Children Ages 1-19

DEFINITION: This indicator represents the number of deaths of children ages 1 through 19, as recorded on death certificates.

PERCENTAGE: The denominator is total resident deaths in respective geographic areas.

GEOGRAPHY: Data reflect the child's place of residence rather than the location of death.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of child deaths is one through five. In these cases '<6' is indicated.

SOURCE: North Dakota Department of Health, Division of Vital Records.

Newborns Born at a Medical Facility Receiving a Hearing Screening

DEFINITION: This indicator represents the number of newborns born in North Dakota medical facilities who received a hearing screening prior to hospital discharge. There are three possible outcomes for a birth hearing screening: Pass Both, Bilateral Referral, and Unilateral Referral. A Pass Both indicates an infant had the birth hearing screen and passed in both ears indicating normal hearing. A Bilateral Referral indicates an infant failed the birth hearing screen in both ears and is recommended to have an outpatient re-screen completed by one month of age. A Unilateral Referral indicates an infant failed one ear during the birth hearing screen but passed the other ear, and is recommended to have an outpatient re-screen completed by one month of age. Infants with a Bilateral and Unilateral Referral birth screen outcome should be offered an Early Intervention services referral. *Did Not Pass the Initial Hearing Screening* represents the number of resident newborns who were screened for hearing loss and identified as having some form of hearing impairment, and were referred for further testing (i.e., a Bilateral or Unilateral Referral).

PERCENTAGE: The denominator for the main indicator is total resident live births in respective geographic areas. The denominator for the subcategory is the number of screened births in respective geographic areas.

GEOGRAPHY: Data include hospital births to North Dakota residents and are presented based on the mother's/guardian's county of residence. Out-of-state births to North Dakota residents are excluded.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Data are not reported for geographies where the number of screened births is one through five. In these cases '<6' is indicated.

NOTE: Situations for which a screening did not take place include those in which the infant died before a screening could take place and those for which the parents refused consent to have their child's hearing screened. It is currently unknown if hearing screenings are performed on the home birth population.

SOURCE: North Dakota Early Hearing Detection and Intervention (EHDI), North

Dakota Center for Persons with Disabilities, Minot State University.

Women, Infants, and Children (WIC) Program Participants

DEFINITION: This indicator represents persons who are eligible for and receive a food voucher and nutrition education contract through the WIC Program. To be eligible for WIC, low-income women, infants, and children must be found to be at nutritional risk for medical or dietary reasons. WIC is a prevention program targeted to provide nutrition education, nutritious food, and access to health care. WIC is not an entitlement program.

GEOGRAPHY: Data reflect the participant's place of residence.

TIME FRAME: Fiscal Year (July 1 through June 30).

LIMITATIONS: Fort Berthold and Standing Rock Indian reservations administer their own programs. Thus, data for these two reservations are not included in the state WIC numbers. North Dakota WIC data do cover the Spirit Lake and Turtle Mountain reservations as well as the Trenton Indian Service Area.

SOURCE: North Dakota Department of Health, Division of Nutrition and Physical Activity, WIC Program.

Medicaid Recipients Ages 0-20

DEFINITION: This indicator represents the number of persons ages 0 through 20 who are recipients of Medicaid. Medicaid is a federally funded entitlement program available to eligible persons based upon need. It is designed to assist individuals and families who do not have enough income to obtain health care. Medicaid is authorized by Title XIX, a 1965 amendment to the federal Social Security Act. Medicaid differs from Medicare, which is a federally funded program for the elderly and disabled.

PERCENTAGE: The denominator is the total population ages 0 through 20 in respective geographic areas.

GEOGRAPHY: Data reflect place of residence.

TIME FRAME: Fiscal Year (July 1 through June 30).

SOURCE: North Dakota Department of Human Services.

Uninsured Children Ages 0-18

DEFINITION: This indicator represents

DEFINITIONS AND DATA SOURCES

the number of children under the age of 19 who are not covered by health insurance. *At or Below 200% of Poverty* represents the number of children under the age of 19 who are not covered by health insurance and are living in families with incomes at or below 200% of the federal poverty level (i.e., families with incomes less than twice the federal poverty level).

PERCENTAGE: The denominator for the main indicator is the total child population ages 0 through 18 in respective geographic areas. The denominator for the subcategory is all uninsured children ages 0 through 18. **GEOGRAPHY:** Data reflect place of residence.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: The estimates are based on statistical models combining survey data with population estimates and administrative records. As such, they are subject to modeling error. For the 90% confidence intervals associated with state and county-level data, visit <http://www.census.gov/did/www/sahie/>.

SOURCE: U.S. Census Bureau, Small Area Health Insurance Estimates, <http://www.census.gov/did/www/sahie/>.

SAFETY AND RISKY BEHAVIOR

Child Abuse and Neglect Reports

DEFINITION: This indicator represents the total number of official assessments made to the North Dakota Department of Human Services (NDDHS) on behalf of a child where there is the suspicion of child abuse or neglect. Child abuse and neglect refers to any recent act or failure to act on the part of a parent or caregiver which results in death, serious physical or emotional harm, sexual abuse or exploitation, or an act or failure to act which presents an imminent risk of serious harm.

Physical harm refers to any non-accidental physical injury to the child, and can include striking, kicking, burning, or biting the child, or any action that results in a physical impairment of the child. Sexual abuse involves sexual contact between a child and an adult or a significantly older, more powerful person. Sexual abuse may include other exploitative behaviors such

as inappropriate sexual comments made to a child, taking or showing sexually explicit photographs or exposing a child to pornography or adult sexual activity. Emotional harm refers to injury to the psychological capacity or emotional stability of the child as evidenced by an observable or substantial change in behavior, emotional response or cognition, or as evidenced by anxiety, depression, withdrawal, or aggressive behavior. A neglected child, also referred to as a deprived child, refers to a child who 1) is without proper parental care or control, subsistence, education, or other care or control necessary for the child's physical, mental, and emotional health, or morals, and the deprivation is not due primarily to the lack of financial means of the child's parents, guardian, or other custodian; 2) has been placed for care or adoption in violation of law; 3) is without proper parental care, control, education, or other care and control necessary for the child's well-being because of the physical, mental, emotional, or other illness or disability of the child's parent or parents, and that such lack of care is not due to a willful act of commission or act of omission by the child's parents, and care is requested by a parent; 4) is in need of treatment, and whose parents, guardian, or other custodian have refused to participate in treatment as ordered by the juvenile court; 5) was subject to prenatal exposure to chronic and severe use of alcohol or any controlled substance in a manner not lawfully prescribed by a practitioner; 6) is present in an environment subjecting the child to exposure to a controlled substance or drug paraphernalia. Abandonment of a child refers to a situation in which 1) the parent's identity or whereabouts are unknown, 2) the child has been left by the parent in circumstances where the child suffers serious harm, or 3) the parent has failed to maintain contact with the child or to provide reasonable support for a specified period of time.

The North Dakota Century Code mandates certain persons (those who have contact with children as a part of their professional duties) to report incidents of suspected child abuse or neglect. Any person may report an incident. The NDDHS or its designated agent, a regional or county Child Protection Service (CPS) social worker, will respond to the report by conducting an assessment of the family being reported.

This process allows for the assessment of present safety of the child(ren) and the risk of future maltreatment, while simultaneously noting family strengths and needs. These strengths, along with any necessary service interventions, may lead to the amelioration of child maltreatment within a particular family. The CPS social workers use a risk assessment tool to help direct the intervention and assessment process. CPS teams determine if 1) services are required or 2) services are not required. Services are required if a high level of risk is determined to exist for the child(ren), and/or the family's needs are such that immediate service is required in order to lessen the safety risk. When it is determined that services are required, North Dakota Century Code requires a referral to Juvenile Court and a social worker (case manager) must be assigned to coordinate services. If no services are required, it has been determined that 1) no to low risk for the child(ren) exists, and/or 2) the CPS team suggests a discussion with the family on the availability of services, which are unrelated to any specific risk factors, or 3) the family's service need is nonexistent. Services may be offered or recommended to the family even though no services are required for the protection of a child.

GEOGRAPHY: Data reflect the location of the assessment.

TIME FRAME: Federal Fiscal Year (October 1 through September 30).

LIMITATIONS: Reports of child abuse and neglect from tribal lands are processed separately and are not included in these numbers. Data are not reported for geographies where the number of child abuse and neglect reports is five or less. In these cases '<6' is indicated.

NOTE: In an effort to coordinate with federal reporting procedures, data regarding child abuse and neglect are presented for the Federal Fiscal Year (FFY) (October-September) rather than for the Calendar Year (CY) (January-December). While trends are consistent between the two reporting procedures, please use caution when comparing FFY data (first reported in the 2007 *Fact Book*) with CY data which were reported prior to the 2007 *Fact Book*.

SOURCE: North Dakota Department of Human Services, Children and Family Services.

DEFINITIONS AND DATA SOURCES

Suspected Victims of Child Abuse and Neglect

DEFINITION: This indicator represents the number of children involved in assessments made to the North Dakota Department of Human Services (NDDHS) where there is the suspicion of child abuse or neglect (see the *Child Abuse and Neglect Reports* indicator definition for detailed definitions of abuse and neglect, and a description of the assessment process). Child Protection Service (CPS) social workers use a risk assessment tool to help direct the intervention and assessment process. CPS teams determine if 1) services are required or 2) services are not required. When there are *Victims in Cases Where Services Are Required*, a high level of risk is determined to exist for the child(ren), and/or the family's needs are such that immediate service is required in order to lessen the safety risk. When it is determined that services are required, North Dakota Century Code requires a referral to Juvenile Court and a social worker (case manager) must be assigned to coordinate services (see the *Child Abuse and Neglect Reports* indicator definition for detailed definitions of other CPS determinations).

PERCENTAGE: The denominator for the main indicator is the total child population ages 0 through 17 in respective geographic areas. The denominator for the subcategory is the number of suspected child victims in respective geographic areas.

GEOGRAPHY: Data reflect the location of the assessment.

TIME FRAME: Federal Fiscal Year (October 1 through September 30).

LIMITATIONS: Reports of child abuse and neglect from tribal lands are processed separately and are not included in these numbers. Data are not reported for geographies where the number of child abuse and neglect victims is five or less. In these cases '<6' is indicated.

NOTE: In an effort to coordinate with federal reporting procedures, data regarding child abuse and neglect are presented for the Federal Fiscal Year (FFY) (October-September) rather than for the Calendar Year (CY) (January-December). While trends are consistent between the two reporting procedures, please use caution when comparing FFY data (first reported in the 2007 *Fact Book*) with CY data which were reported prior to the 2007 *Fact Book*.

SOURCE: North Dakota Department of Human Services, Children and Family Services.

Children Ages 10-17 Referred to Juvenile Court

DEFINITION: This indicator represents the number of youth ages 10 through 17 referred to juvenile court for delinquent and unruly behavior offenses. It excludes children in cases involving abandonment, abuse/neglect, deprivation, educational neglect, other or no fault deprivation, termination of parental rights, or other special proceedings.

PERCENTAGE: The denominator is the total child population ages 10 through 17 in respective geographic areas.

GEOGRAPHY: Data reflect the offense location, not the juvenile's place of residence. In addition, the number of juveniles is unduplicated only at the county level of geography. Approximately 6% of juvenile offenders were referred to court in multiple counties in 2015. In these cases, each juvenile is counted once for each county in which they are referred. Because the regional and state level data are a sum of the counties, these multi-county offenders are duplicated at the regional and state levels of geography.

TIME FRAME: Calendar Year (January 1 through December 31).

LIMITATIONS: Referrals made to the four tribal courts in North Dakota are not included in this indicator.

NOTE: A new reporting procedure for juvenile court referrals and offenses was implemented by the North Dakota Supreme Court beginning with 2003 data. In this new reporting procedure, the data reflect the year in which the case was referred to court, not the year when the case was settled (disposition date). This reporting procedure affects data that were first reported by North Dakota KIDS COUNT in the 2005 *Fact Book*. Thus, caution should be used when making comparisons to data presented in *Fact Books* prior to the 2005 publication.

SOURCE: North Dakota Supreme Court, State Court Administrator's Office.

Children Ages 16-19 Not Enrolled in High School, Not High School Graduates, and Not in the Labor Force

DEFINITION: This indicator represents the number of children ages 16 through 19 who have not completed high school, are not enrolled in school, and are not in the labor

force.

PERCENTAGE: The denominator is the total child population ages 16 through 19 in respective geographic areas.

GEOGRAPHY: Data reflect the child's place of residence.

TIME FRAME: Data represent a 5-year period estimate. For example, 2014 estimates reflect data collected over a 60-month period from 2010 to 2014.

LIMITATIONS: Data are based on a sample and are subject to sampling variability. Characteristics for geographic areas experiencing dynamic change due to such things as an environmental catastrophe (e.g., flood) or a plant closing will be mitigated since these estimates cover five calendar years of data. Also, caution is needed when using the multi-year estimates for estimating year-to-year change in a particular characteristic. This is because four of the five years in the 5-year estimate overlap with the next year's estimate. Ideally, trend analysis with multi-year estimates should be done using estimates from non-overlapping periods (i.e., 2005-2009 and 2010-2014).

SOURCE: U.S. Census Bureau, American Community Survey (ACS) 5-Year Estimates, Table B14005.

The *Fact Book* publication is produced by North Dakota KIDS COUNT, a program sponsored by the Annie E. Casey Foundation and supported by the Center for Social Research at North Dakota State University. North Dakota KIDS COUNT measures the educational, social, economic, and physical well-being of children in North Dakota, county by county.

Understanding the current and historical benchmarks for child well-being, the underlying context for each, and the relative importance of potential outcomes is a vital process in forming decisions to improve the lives of children, families, and communities in our state.

Permission to copy, disseminate or otherwise use information from this publication is granted as long as appropriate acknowledgment is given.
