- B. Motor vehicle body damage disclosure requirements apply only to the transfer of title on vehicles of a model year released in the current calendar year and those vehicles of a model year manufactured in the seven years before the current calendar year. When a motor vehicle has been subject to this disclosure requirement and more than eight years have elapsed since the date of manufacture, the holder of the certificate of title with the damage disclosure may have the disclosure removed and a new certificate of title issued for a fee of \$5. The disclosure can only be removed if the vehicle has no prior "SALVAGE" history.
- C. As used in this section, "motor vehicle body damage" means a change in the body or structure of a motor vehicle, generally resulting from a vehicular crash or accident, including loss by fire, vandalism, weather, or submersion in water, resulting in damage to the motor vehicle which equals or exceeds the greater of \$8,000 or 40 percent of the pre-damage retail value of the motor vehicle as determined by the National Automobile Dealers Association Official Used Car Guide. The term does not include body or structural modifications, normal wear and tear, glass damage, hail damage, or items of normal maintenance and repair.
- D. A person repairing, replacing parts, or performing body work on a motor vehicle that is less than nine (9) years old shall provide a statement to the owner of the motor vehicle when the motor vehicle has sustained motor vehicle body damage requiring disclosure under this section. The owner shall disclose this damage when ownership of the motor vehicle is transferred. When a vehicle is damaged in excess of 75 percent of its retail value, as determined by the National Automobile Dealers Association Official Used Car Guide, the person repairing, replacing parts, or performing body work on the motor vehicle that is less than nine (9) years old shall also advise the owner of the motor vehicle that the owner of the vehicle must comply with section 39-05-20.2.
- E. The amount of damage to a motor vehicle is determined by adding the retail value of all labor, parts, and material used in repairing the damage. When the retail value of labor has not been determined by a purchase in the ordinary course of business, for example, when the labor is performed by the owner of the vehicle, the retail value of the labor is presumed to be the product of the repair time, as provided in a generally accepted auto body repair flat rate manual, multiplied by \$35.
- F. DAMAGE DISCLOSURES will not be required on the following transactions:

- One stop light (unless stoplight on towing vehicle may be seen from the rear) (39-21-06, 08).
- One taillight on the rear (mounted 15 to 72 inches above the ground). Trailers manufactured or assembled after 1 January 1964 shall be equipped with at least two tail lamps mounted on the rear (39-21-04).

Trailers over 80 inches wide require:

- Two red reflectors on rear, one on each side (mounted 15 to 60 inches above ground) (39-21-05, 10).
- Two red clearance lamps on rear, one on each side (39-21-08).
- Two amber clearance lights on front, one on each side (39-21-08).
- One stop light on the rear (39-21-06, 08).
- One taillight on the rear (mounted 15 to 72 inches above ground). Trailers manufactured or assembled after 1 January 1964 shall be equipped with at least two tail lamps mounted on the rear (39-21-04).

Turn signal lights:

- Trailers over 3,000 pounds gross weight are required to have turn signal lights (39-21-06).
- Trailers less than 3,000 pounds gross weight are not required to have signal or stop lamps, if such lamps are visible from the rear of the towing vehicle (39-21-06, 08).

Pulling two trailers:

- A motor vehicle may draw two trailers. This would allow the towing of a boat behind a gooseneck or bumper hitch camping trailer.

Safety chains or brakes:

- Every trailer or semitrailer when operated upon a highway at a speed in excess of twenty-five miles per hour shall be equipped with safety chains or brakes (39-21-32).
- If a second trailer is pulled behind a gooseneck or 5th wheel trailer, the first trailer must be equipped with brakes; the second trailer must be equipped with safety chains. If the first trailer is a bumper hitch design, the trailer must be equipped with brakes and safety chains. If the gross weight of the second trailer exceeds 3,000 pounds, brakes are also required. The brakes must be so designed as to be applied by the driver of the truck from the cab. The brakes must be so designed and connected that in case of an accidental breakaway, the brakes will be automatically applied on the trailer that breaks loose (37-06-03-02, NDAC).

Mirrors:

- Every motor vehicle, operated singly or when towing any other vehicle (trailers, etc.), shall be equipped with a mirror so located as to reflect to the driver a view of the highway for a distance of at least two hundred feet to the rear of such motor vehicle (39-21-38).

NORTH DAKOTA AXLE WEIGHT LIMITATIONS

No single axle shall carry a gross weight in excess of 20,000 pounds. Axles spaced 40 inches or less apart are considered one axle. Axles spaced eight (8) feet apart or over are considered as individual axles. The gross weight of two individual axles may be restricted by the weight formula except that on highways other than the interstate, two axles spaced eight (8) feet apart or more may have a combined gross weight not to exceed 40,000 pounds. Spacing between axles shall be measured from axle center to axle center.

Axles spaced over 40 inches apart and less than eight (8) feet apart shall not carry a gross weight in excess of 19,000 pounds per axle. The gross weight on a tandem axle shall not exceed 34,000 pounds. The gross weight of three or more axles in a grouping is determined by the measurement between the extreme axle centers except that on highways other than the interstate, groupings of three or more axles may have a gross weight not to exceed 48,000 pounds.

The weight per inch width of tire shall not exceed 550 pounds. Metric tire sizes are converted to inches by dividing millimeters by 25.4. The width of tire for solid tires shall be the rim width. For pneumatic tires the width of tire shall be the manufacturer's width. The weight in pounds on any one wheel shall not exceed one-half the allowable axle weight. Dual tires are considered one (1) wheel.

Examples of Bridge Formula Application on the Interstate System

Note: On the Interstate System, the interior and exterior bridge measurement shall be used to determine the gross vehicle weight of a vehicle or combination of vehicles.

Examples of Bridge Formula Application on the State Highway System

Note: On highways other than the Interstate System, only the exterior bridge measurement shall be used to determine the gross vehicle weight of a vehicle or combination of vehicles. Groupings of three or more axles may have a gross weight not to exceed 48,000 pounds. See Highway Patrol for additional information on 4-axle straight trucks.

The owner shall disclose this damage when ownership of the motor vehicle is transferred.
